Provides protection in environments with higher ambient temperatures or radiant heat, such as in steel mills and foundries. Full Brim style shields from sun and rain.

Glo-Mega® Omega II®

Glow-in-the-Dark head protection great for the mining industry, ship yards, underground utilities, and night highway construction.

Q:What causes the Glo-Mega to glow?

A: The glow is caused by photoluminescence, commonly referred to as glow-in-the-dark. The materials used in the Glo-Mega are nothing at all like the glow-in-the-dark materials of several years ago. They charge quickly and glow much brighter and much longer than the glow-in-the-dark items you may remember having as a child.

Q:How long does it take to charge the Glo-Mega?

A: Charging for 10 to 20 minutes in sunlight would be excellent to produce a strong long lasting glow. A half hour in bright fluorescent light would be very good. Even 20 minutes near a 40 watt incandescent bulb will generate a significant glow.

Q:How brightly does the Glo-Mega glow?

A: In intermediate levels of lighting, the Glo-Mega takes on a greenish color as the glow competes with the light from its surroundings. In dark conditions, the Glo-Mega's glow has been measured at 1220 mcd/m2 immediately after charging and, after ten minutes was still 45 times as bright as required by ASTM 2073 for emergency signage.

Q:How long can the glow be seen?

A: To eyes accustomed to the dark, the glow can be seen for several days or even weeks after a suitable charge.

Q:How does the after-glow of the Glo-Mega fade?

A: The fading begins as soon as the source of charging is removed - faster at first, then slowing over a long period of time. For a number of hours, this fading is partially offset by a dramatic increase in the sensitivity of the eye to see light.

Q:What is the useful life of the product?

A: The Glo-Mega has the normal life span of a molded polyethylene safety helmet. The photo luminescent properties however, should last almost indefinitely.

Mega Ratchet®

The "Secure-Fit" ratchet features an easy turn knob that allows size adjustment from head sizes 6.5 - 8 without removing the helmet. Each turn of the ratchet knob automatically locks with 50 meshing teeth securing the position. The no-slip hold maintains the desired fit even in the most physically active jobs or extreme weather conditions. The hinged ratchet fits low on the nape of the neck and is height-adjustable for a perfect fit. The ratchet mechanism is cushioned with thick sponge padding for long-lasting comfort.

BEAT THE HEAT

COOLERZ[®] RETAIL READY

ADVANCED EVAPORATIVE COOLING TECHNOLOGY with Hyperkewl[™]

Coolerz[®] Vest, Crown Cooler and Neck Shield

use an advanced evaporative cooling system with a water management system to maximize cooling, while minimizing moisture transfer to the wearer.

- Enhanced cooling capacity
- Managed and directional evaporative cooling release
- Cools longer than other evaporative systems
- Reduces wetness to wearer
- Water repellent nylon inner
- Quilted nylon outer

Coolerz[®] with Hyperkewl[™] products utilize a unique polymer chemistry to achieve rapid absorption and stable water storage. The chemical formulation creates enhanced evaporation and longevity. Users can expect the evaporative cooling fabric to provide temperatures that are up to 15 - 20 degrees (F) cooler than the ambient temperature. The exact temperature difference will depend on humidity, exposure to airflow and other environmental conditions.

Easy to use. Simply submerge in water for 1 - 2 minutes, then gently remove excess water.

Garments will remain hydrated for several hours and can be rehydrated as needed.

ANSI/ISEA 107-2015 Flame Resistant vs. Flame Retardant

Flame Resistant apparel are garments which are tested and meet various industry standards that require self-extinguishment of the garment after exposure to flames, sparks and more. Garments labeled under the ANSI 107-2015 Standard shall state that flame retardant garments do not provide fire protection.

Flame Retardant is a chemical used to treat materials for self-extinguishment which may or may not meet any accepted industry standards. Caution: Logos applied to Flame Retardant treated fabrics may decrease the effectiveness of the garment's flame retardant properties.

ANSI/ISEA 107-2015 uses the term Flame Resistance for high visibility garments which fully meet one or more of the following standards:

- ASTM F1506
- ASTM F1891
- ASTM F2302
- ASTM F2733
- NFPA 1971
- NFPA 1977
- NFPA 2112

WARNING: Purchasing a vest requires careful selection to ascertain if the garment will protect a worker from sources of heat or ignition that may be present in the work zone. Some commercially available garments listed as FR treated may not give the level of protection called for by the ANSI/ISEA standard, and may not last for more than one wear/wash cycle, nor may all components have flame resistant properties even if the label states that it meets ANSI/ISEA 107. The label must indicate one of the foregoing ASTM or NFPA standards to be considered Flame Resistant under the ANSI/ISEA 107 standard.

ERB Safety ANSI/ISEA 107 2015 Update – Labeling changes are underway on all Aware Wear Flame Resistant and Flame Retardant vests. All flame resistant vests meet the performance criteria of ANSI/ISEA 107-2015 except for required labeling.

Note: To prolong life of flame retardant treatment, do not wash.

Meets ANSI/ISEA 107 Requirements

In-house Decorating Services

Minimum quantities apply, call for details. 855-621-9100

SCREEN PRINTING

Let ERB handle your Screen Printing needs. Low minimum order quantities of 12 pieces, low cost and fast lead times! We use polyester based ink to ensure your logo is top quality and will properly adhere to the garment. Print up to 4 spot colors.

CUSTOM VINYL TRANSFER PRINTING

With a low minimum order of 12 pieces, ERB makes it easy to order Custom Vinyl Transfer Printing. Choose from full color, multi-color or complicated designs. Unlike screen printing, vinyl lays over mesh holes on the vest, allowing for more accuracy and precision.

CUSTOM EMBROIDERY

ERB also offers Embroidery services! Low minimum order quantities of 36 pieces, low cost and fast lead time! Whether it be on a safety vest, polo shirt or boonie hat, ERB can service your needs. Call for your quote now on up to 10,000 stitches and unlimited colors.

* Minimum area of background material required for ANSI compliance may not be met if excessively large text or logos are printed on garment.

*All custom orders are subject to a 5% overage or shortage.

SEE PAGE 103 FOR ADDITIONAL INFORMATION

ERB Safety does not assume responsibility for errors or damage to our products when printed by third parties.

HotHands®

HotHands® warmers are single use air-activated heat packs that provide everyday warmth and are ideal for keeping your body warm when the temperature gets cold. They're available in several styles designed for hands, feet and body. Have you tried them all?

How do HotHands® warmers work?

HotHands® contain ingredients like iron, activated carbon and water. Once these ingredients come into contact with the oxygen in the air, the ingredients oxidize and produce heat. The combination of ingredients has been specially formulated to ensure a constant and comforting heat for a wide variety of uses.

- Up to 8 hours or more of long lasting heat!
- Ready to Use
- Air-Activated
- Safe, Natural Heat

FT-30

- Qualitative fit test apparatus: bitter solution
- 1 per box

Item # 13599

8293Q

- Quantitative fit test respirator, P100
- 1 per box

Item # 21233

8233Q

- Quantitative fit test respirator, N100
- 1 per box

Item # 21234

8293Q and 8233Q

To be used exclusively for Quantitative Fit Testing.

NOT to be used for respiratory protection.

3M™ RESPIRATOR ACCESSORIES

504

- Respirator cleaning wipes
- 8" x 10" towelettes are alcohol-free and will not damage the facepiece materials
- 100 per box

Item # 13595

**6885 Clear
6886 Tinted Lens Cover**

- For 6000 series full facepiece respirators to protect and extend life of shield
- 25 per bag

Clear - Item # 13552
Tinted - Item # 13600

7899-100

- Clear lens cover
- For 7000 series full facepiece respirator to protect and extend life of shield
- 100 per box

Item # 13620

WARNING!

These respirators help protect against certain airborne contaminants. Before use, the wearer must read and understand the USER Instructions provided as a part of the product packaging. A written respiratory protection program must be implemented meeting all the requirements of OSHA 1910.134 including training, fit testing and medical evaluation. In Canada, CSA standards Z94.4 requirements must be met and/or requirements of the applicable jurisdiction, as appropriate. Misuse may result in sickness or death. For proper use, see packaging instructions, supervisor, or call 3M PSD Technical Service in USA at 1-800-243-4630 and in Canada at 1-800-267-4414.

See 2017 price list for program details

Aware Wear high visibility apparel includes: vests, t-shirts, sweatshirts, bandanas, boonie hats, jackets, rainwear and more. *Minimum order is 12 garments.*

Gloves – our most popular logo'd gloves are ERB Safety's Mechanics Gloves styles: M100, M200, M300. *Minimum is 36 pair.*

Other Customization Services

- Custom color head protection, provide PMS color
- Custom fill New Hire Kits
- Custom packaged products per user requirements

Guidelines for Submitting Logo Artwork

Vector Files:

For the best printing results, artwork should be provided as a VECTOR file.

- All fonts MUST be converted to outlines
- Accepted applications for providing vector file formats: Adobe Illustrator (.AI, .EPS), Corel Draw (.CDR)

Other File Formats:

Although not recommended, certain high resolution image file formats (.JPG, .PNG, .PSD, .TIF, .PDF), may be used providing they meet the approval of our graphics department and ERB printing specifications below.

- Artwork files must have a minimum resolution of 300 DPI
- Artwork files must be 100% of the final output size
- .JPG files must be saved at the maximum quality level
- Accepted applications for providing high-resolution image files: Adobe Photoshop (.JPG, .PNG, .PSD, .TIF, .PDF)

Unacceptable Artwork Formats:

The following files ARE NOT acceptable for printing.

- Images with resolutions less than 300 DPI
- Images downloaded from the Internet or websites
- Highly compressed .JPG images (saved at low quality level)
- Images taken from screen captures
- Photocopies, business cards, stationary, drawings, decals, faxes or other hard copy artwork
- .BMP or .GIF files

If your artwork does not meet our printing requirements and must be re-created, we offer artwork creation services for a fee. This might add extra time to product delivery date.
