Protective Industrial Products is a proud member of

AFFILIATED DISTRIBUTORS
The Largest Distributor Network in North America.

EVERGREEN MARKETING GROUP
An alliance of over 60 independent construction and industrial tool distribution companies located throughout the United States.

INDUSTRIAL BUYER'S CONSORTIUM
Alliance of Leading Industrial Supply Distributors in the U.S.

INDUSTRIAL SUPPLY ASSOCIATION
Formerly the Industrial Distributor Association (IDA) and the Industrial Supply Manufacturer Association (ISMA).

NETPLUS ALLIANCE
Alliance for Distributors and Manufacturers.

SAFETY MARKETING GROUP
The World's Largest Consortium of Independently Owned Safety Equipment Distributors.

SPHERE 1
A cooperative of independent tool and fastener distributors working together to achieve competitive and sustainable advantages in the marketplace.

STAFDA
STAFDA is an international educational association comprised of distributors, manufacturers, rep agents, and affiliates (trade press) serving the construction/ industrial market.

PROTECTIVE INDUSTRIAL PRODUCTS

BRINGING THE BEST OF THE WORLD TO YOU®

PROTECTIVE INDUSTRIAL PRODUCTS OR PIP, AS WE HAVE BECOME KNOWN, IS A US-BASED COMPANY WITH OPERATIONS AROUND THE WORLD.

PIP is jointly owned by the families of Joe Milot, President, and his partner, Wellson Tao. Initially started as a supplier of work gloves, today we are a global provider of a vast array of consumable personal protective equipment (PPE) to multiple industries and channels of distribution.

PIP STARTED AS A SUPPLIER OF GLOVES. TODAY WE ARE A GLOBAL PROVIDER OF A VAST ARRAY OF CONSUMABLE PERSONAL PROTECTIVE EQUIPMENT TO MULTIPLE INDUSTRIES AND CHANNELS OF DISTRIBUTION.

WE FIND REASONS TO SAY "YES" TO CUSTOMERS

WE PLACE THE CUSTOMER EXPERIENCE ABOVE ALL ELSE. WE SUCCEED AT HELPING DISTRIBUTORS ENHANCE THEIR PRODUCT OFFERING, WHILE MAINTAINING THE ABILITY TO PROVIDE CUSTOMERS WITH COMPETITIVELY PRICED, QUALITY SAFETY PRODUCTS.

AN EASE OF DOING BUSINESS

We strive to be the easiest company that our customers do business with in any industry.

OUR PEOPLE

We employ people trained and experienced in the business and recognized among the best in the industry.

A GLOBAL PROVIDER OF INNOVATIVE SAFETY PRODUCTS

As the referenced leader in hand protection, we continue to expand our above-the-neck, electrical, traffic safety and first responder product lines.

- Three manufacturing facilities along with three distribution centers in the US
- Export operation from Asia/Pacific to over 10 sales and distribution subsidiaries around the world
- Expertise in sourced manufacturing driven by a team of technical product managers and on-site quality inspection personnel
- R&D capabilities include specialty yarns and seamless knitting technology, joint development in new lens/fit applications in eyewear, as well as ergonomic garment design
- Collaborative development with global partner ATG® for hand protection, JSP® for head and respiratory protection, Hellberg® for hearing protection and Pacific Helmets for first responder head protection

BRINGING THE BEST OF THE WORLD TO YOU®

1984 to 1999

1984

- Joe Milot and Wellson Tao formed Protective Industrial Products in a 400 sq. ft. space in Albany, NY.

1991

- Purchased assets of Intermarket Imports, Inc. and expanded head office and distribution center into a 28,000 sq. ft. facility in Guilderland, NY.

1998

- Acquired L.A. Sinotech & established a distribution center in California

2000 to 2005

2001

- Acquired Georgia Safety Group and Gloves Unlimited, Inc.

- Opened a distribution center in Memphis, TN.

2002

- PIP Mexico formed

2003

- Acquired PRI Industries - a US manufacturer of specialty seamless knits

2004

- Expanded New York operations to 125,000 sq. ft. and Tennessee distribution center to 90,000 sq. ft.

- Established exclusive sales partnership with ATG® Gloves in North America

- PIP Latin America formed

2006 to 2010

2006

- Brahma Glove Co. acquired - consumer division established

- Mud® consumer glove brand and business acquired

- DSM Dyneema® license acquired

2008

- West County Gardener® consumer glove brand and business acquired

- PIP Italy established in Rome

2009

- SafetyGear™ USA acquired to extend safety products offering to protective and hi-vis garments

2011 to 2016

2011

- H.L. Bouton® Eyewear brand and business acquired

- Established exclusive sales partnership with JSP® in North America

- McHenry Knitting and Manufacturing acquired

- Certified Insulating Products assets acquired to enter the electrical safety market

- DuPont™ Kevlar® license acquired

- PIP Balkans formed

- PIP Iberia formed

2012

- ISSI Eyewear acquired

- PIP Canada established

- PIP Asia/Pacific operations expanded from Hong Kong to include sales and distribution centers in Malaysia and China

2014

- Acquisition of Safe Industries - manufacturer of knitted sleeves

2016

- Acquisition of Safety Works

PIP TODAY

Over 300 employees

Global presence in the Americas, Europe and Asia/Pacific

Referenced global leader in hand protection

Over 3,500 products available from distribution centers totaling 500,000 sq. ft. in the US alone

PIP VENDING READY PROGRAM

BRINGING THE BEST OF THE WORLD TO YOU®

PIP VEND READY PACKAGED FOR VEND MACHINE

VEND-READY GLOVES: STOCKED & READY TO SHIP

Over twenty of our most popular glove styles are now available in vend-ready packaging. These are stocked and ready to go. Consistent width and thickness ensures proper dispensing.

MANY OF PIP'S PRODUCTS ARE VEND-READY IN THEIR STANDARD PACKAGING

HI-VIS VESTS AND T-SHIRTS

All PIP Hi-Vis Vests and T-shirts are or soon will be in vend-ready packaging! See page 218 for our complete product selection.

BOUTON® OPTICAL

All PIP safety glasses and safety goggles are vend-ready! See page 178 for our complete product selection.

WE CAN VEND-READY ALMOST ANYTHING. Our Black Pearl manufacturing facility specializes in custom logoing, packaging and testing. We can do any configuration to meet your special needs.

CUSTOMIZED RETAIL READY™ PROGRAM

PIP IS YOUR SAFETY PRODUCT PARTNER FOR MAXIMIZING YOUR SHOWROOM PRODUCT SALES.

No two showrooms are the same, constricted sometimes by space and other times by location, it is our job to adapt to your needs. That's what PIP's customized Retail Ready™ Program is all about.

Over 30 years of industrial and do-it-yourself retail market experience has allowed us to develop an extensive line of PPE products individually packaged and ready to retail, out the door.

PIP RETAIL READY TAILORED TO YOU.

**PIP
RETAIL
READY**

PIP RETAIL READY PROGRAM

BRINGING THE BEST OF THE WORLD TO YOU®

SHELF TALKER

BASKET TALKER

PEG TALKER

PIP RETAIL READY DISPLAY TALKERS

Laminated and durable, these display talkers come complete with mounting ties and mention features that resonate with customers. Clear bullet points identify the product, key features and ideal use. That's all that's needed to make the difference.

FOR YOU. BY YOU.

THINK LIKE A RETAILER

To do Retail Ready right, you have to think like a retailer. It's all about taking advantage of seasonality and trends. PIP already offers you the most comprehensive early-buy program in the industry. We now include separate early-buy special point-of-sale deals that are tailored to take maximum advantage of your walk-in traffic. Take for example the first storm of winter; think of how many customers forget their gloves. Maximize sales with a winter glove rack sitting on your counter ready to pump those impulse sales.

EYE-CATCHING POINT-OF-PURCHASE DISPLAYS ARE THE KEY

Standard available displays are meant to be versatile and adaptable in all showrooms.

GONDOLA DISPLAY

DUMP DISPLAY

TOWER DISPLAY

CUSTOMIZED PLANOGRAMS JUST FOR YOU

PIP can tailor your slat wall or gondola display unit to hold key products. With over 30 years of experience and core expertise in our PIP consumer products division, we're sure to help you in putting together a fast-turning product configuration that meets your needs.

Working with your PIP representative, we can provide you with top sellers in each market channel and our recommendations for optimizing your point-of-purchase displays.

PIP CUSTOM IMPRINTING

BRINGING THE BEST OF THE WORLD TO YOU®

CUSTOM IMPRINTING IS AVAILABLE ON MOST SAFETY EYEWEAR, HARD HATS, GLOVES, VESTS, T-SHIRTS, SWEATSHIRTS, JACKETS, COOLING TOWELS AND BANDANAS.

We use the most advanced technique and quality ink that ensure your logo pops and will not wear off. It's not just our image – it's yours too.

CUSTOM IMPRINTING

FAST. DEPENDABLE. QUALITY PRINTING.

PIP CUSTOM IMPRINTING

BRINGING THE BEST OF THE WORLD TO YOU®

6-DAY TURNAROUND TIME

STATE-OF-THE-ART FACTORY

- 6-day turnaround*
- Low minimums
- Over 12 standard PMS colors available
- Ordering software backed by a specialized core team

**Following approval of logo artwork*

OVER 40% OF COMMON PPE IS LOGOED

- Builds brand presence
- Promotes security on job sites
- Reduces waste

EXPERIENCE THE DIFFERENCE

FAST, EASY AND PRECISE. If you don't associate these words with your custom order requests, you're not taking advantage of PIP's logo and imprinting services. With exceptionally quick turnaround times and top quality results, PIP delivers the value-added service you and your customers expect. Put us to the test on your next logo order and experience the difference.

PIP SALES & MARKETING LEADERS

BRINGING THE BEST OF THE WORLD TO YOU®

Forward-Thinking Customer Service

- PIP's Customer Service team has a mission that is beyond J-I-T delivery and world class service; it extends to cover accuracy in information and flawless data transfer and elimination of redundancy.
- EDI order placement, confirmation and payment
- Accuracy plus updated pricing, inventory and product revisions
- Dedicated technical support

Best Trained Sales Team in the Industry

Training is our mission. Customers don't feel confident selling or using product if they're not trained. Lack of confidence leads to mistakes. PIP is dedicated to training all customers.

- Over 100 representatives on the road
- Backed by 30 Regional Sales Managers and National Account Representatives
- SR management team with a combined 120 years of experience in Safety

Marketing – Sales Tools and Promotions to Give You the Edge

- Powerful brands
- Communication
- Digital and print collateral
- Complete product launches
- Advertising and promotions
- Enhanced brand packaging
- Expert pages & videos

Manufacturing Capability

PIP owns three US-based manufacturing operations:

1. **PR Industries (PRI)**, in Chaska, Minnesota produces high-quality specialty knitted gloves for applications requiring cut resistance and resistance to heat. PRI is capable of designing and producing coating patterns that meet specifications on string-knit shells to fit with customers' needs.
2. **McHenry Manufacturing's** knitting and sewing operation in Bluffton, Indiana specializes in protective sleeves, work aprons and hoods.
3. **Black Pearl** Guilderland Center, New York facility offers custom packaging, imprinting and labeling as well as dielectric testing for electrical insulating gloves and is a manufacturer of specialty insulated electrical tools.

GO TO WEBSITE

4 EASY WAYS TO FIND THE PERFECT PRODUCT

- 1 SEARCH THE PRODUCT SELECTOR GUIDE
- 2 BROWSE BY PRODUCT CATEGORY
- 3 BROWSE BY INDUSTRY CHANNEL
- 4 SEARCH BY SKU NUMBER

Product Selector Guides

WE MAKE IT EASY FOR YOU

Our product selector guides will give you the proper answer in just a few clicks and seconds.

CHEMICAL RESISTANT GLOVES SELECTOR GUIDE

Type in your CAS# or select the chemical from our chemical list and we will show you all of our gloves that have been tested against that chemical.

CUT PROTECTION GLOVES SELECTOR GUIDE

Answer four quick questions and we'll give you the product that gets the job done.

EYE PROTECTION SELECTOR GUIDE

This guide will provide you with the right safety eyewear for your working conditions. Just answer four simple questions and you're done!

Other Exciting Website Features

DOWNLOAD SPEC SHEETS & LITERATURE

All the valuable information you need at your fingertips. Helping you lose those stacks of papers with easy to download spec sheets and literature.

VIDEO FEATURETTES

Informative, short videos that pack a lot of punch and are loaded with product features and benefits.

ICONS THAT ARE INFORMATIVE

What does that icon or rating mean? Scroll over our enhanced icons to learn more about our products' capabilities.

WORLDWIDE LOCATIONS

Conducting international business? We provide country – and language-specific websites for over 10 countries.

TOUCH SCREEN FRIENDLY

Access our website on the go from your smart phone or tablet without losing any of the website's capabilities.

PIP 3SP™ PROGRAM

BRINGING THE BEST OF THE WORLD TO YOU®

SIMPLE SAFETY SOLUTIONS

ON SITE ASSESSMENT SURVEY

Working collaboratively with our distributor-partners, we perform all 3SP™ site surveys. This assures industrial customers that they are done effectively and without any downtime. 3SP™ trained representatives have a broad understanding of complex manufacturing environments and processes. Chances are they've met many similar challenges before with proven solutions.

TRAINING SEMINARS

The PIP 3SP™ team consists of Product Specialists, Product Managers and PIP Sales Partners, who most often are providers of finished and raw-material products. Qualified and ready to train at your facility, or at our PIP headquarters in Latham, NY or our facility in Memphis, TN where you can experience our customer training center, complete with hands-on activities.

TOOLS TO MAKE THE JOB SAFER

Today's work environment is dynamic. Aging workforce, transient and diverse workers, and increased reliance on automation create challenges related to communication, distraction, stress, and fatigue – all operating at a higher intensity. Training and orientation is short, and we rely on quick and comprehensive tools for answers.

3SP™ IS A MULTIFACETED, LEARNING-BASED PROGRAM DESIGNED AND TAILORED TO MEET THE NEEDS OF OUR CUSTOMERS.

We advance-schedule up to ten 3SP™ training seminars per year at our customer training center in Latham, NY. Call us at (800) 262-5755 to inquire about dates.

ADVANCED

CUT RESISTANT FIBER AND YARN

G-Tek[®]
PolyKor[®]
XRYSTAL[™]

Represents the latest iteration of PolyKor[®] in which it is combined with naturally hardened crystallized minerals. The result is a super tough, durable, cut resistant fiber that is at the peak of performance.

G-Tek[®]
PolyKor[®]

PolyKor[®] Engineered Yarns optimize performance, function, and protection using proprietary blends of select fibers to exceed industry standards. The ultimate objective is affordable cut resistant gloves for practically every application.

G-Tek[®]
Suprene[™]

The latest breakthrough in nanofabrication has resulted in Suprene[™] – an affordable fiber with unparalleled strength and physical properties.

G-Tek[®]
KEV[™]

Takes the power of DuPont[™] Kevlar[®] and combines it with proprietary core technology for maximum cut strength and protection in light heat applications.

CUT PROTECTION MATERIAL BASICS

NAME	ADVANTAGES	DISADVANTAGES
HIGH-PERFORMANCE POLYETHYLENE HPPE	- High strength, high cut and abrasion resistance - Cool and comfortable	- Low heat tolerance
KEVLAR® Aramid fiber	- Good mechanical and cut resistance - Lightweight - Inherent heat properties	- Low resistance to UV rays and moisture
GRAPHENE	- Tough, strong and highly cut resistant	- High thermal conductivity
STAINLESS STEEL Metal yarn	- Excellent cut resistance	- Heavyweight - Poor flexibility - Heat and electricity conductor
GLASS FIBER Textile-grade glass fibers (silica)	- Strong, high initial cut resistance	- Poor wear performance as a result of fiber breakage causing reduced protection and possible skin irritation.

GENERAL PURPOSE MATERIAL BASICS

NAME	ADVANTAGES	DISADVANTAGES
NYLON Synthetic fiber	- High resistance to abrasion and fatigue - Higher durability and strength	- Low resistance to heat
POLYESTER Synthetic fiber	- Good resistance to abrasion - Chemical resistance	- Low resistance to heat
COTTON Natural fiber	- Low price - Comfortable	- Low mechanical resistance
ELASTANE FIBER SPANDEX® / LYCRA® Additive fiber	- High degree of elasticity and comfort - Resistant to abrasion	- Loses elastic properties with heat and wear
NATURAL LEATHER Tanned animal pelt	- Good resistance to tension, puncture and abrasion - Flexible, soft & breathable	- Cuts easily – no cut protection - Inconsistent quality

TECHNOLOGIES

G-Tek®
3GX®

Embedded micro-particles strengthen fibers by up to two times, for higher cut scores. 3GX® offers cool touch comfort and lightweight for improved productivity.

MaxiFlex®
CUT™

Maxiflex® Cut™ gloves synergize proprietary yarns with advanced glove design - applying coatings, technologies, and processes that are above-and-beyond when compared to conventional coatings and manufacturing processes. The result is the ultimate in comfort and durability.

A COMPLETE LINE OF COATINGS LIKE NEVER SEEN BEFORE

Coating grip is key in preventing razor sharp objects from slipping and making contact with hands or arms. Polymer coatings offer some degree of extra protection, however, they will slice easily with razor sharp blades and cannot be relied upon for boosting cut protection. Thicker, tougher materials such as latex and nitrile offer added protection when handling heavier objects with rough edges or burrs.

GET A GRIP

TOUCH SCREEN COMPATIBILITY

Resistive touchscreens, such as those found on most industrial controls, rely on resistive pressure and are unaffected by the use of gloves.

Capacitive touchscreens typically used in tablets, smartphones and laptops rely on the electrical field effect from our finger. PIP trials have found that our disposable gloves and many of our coated seamless knit gloves with thinner coatings will work with today's latest mobile devices. However, we recommend trials prior to equipping teams with gloves. For guaranteed bare-finger precision and sensitivity on any device, we provide the PU coated G-Tek® 33-GT125, featuring conductive fingertip touch technology.

COMPLIANCE TESTING

UNDERSTANDING CUT SCORES

UNDERSTANDING CUT SCORES

PIP GLOVES ARE TESTED TO THE ANSI 105 AND THE EN 388 STANDARD.

Both standards test gloves for Abrasion, Cut, Tear and Puncture. While compliance is not mandated in the U.S., safety managers demand that products are tested and labeled in order to select the best possible equipment for the job being performed.

The European Union (EU) developed a standards and regulatory body that requires anyone wanting to sell products in Europe to attain the CE (Conformité Européene) compliance/markings through the performance testing described in EN 388 "Protective Gloves Against Mechanical Risks." EN 388 is widely recognized internationally.

PIP tests all cut resistant gloves at recognized labs and our test facility in Minnesota.

ANSI-105

FOR DETERMINING CUT SCORE ANSI-105-2006 EDITION USES THE ASTM F2992-15 TEST METHOD

TDM-100 TEST

EN 388

FOR DETERMINING CUT SCORE EN 388:2003 CALLS FOR THE EN-COUP TEST

COUP TEST

	EN 388
Rating	4 4 4 2 C X
Abrasion	1-4
Cut (Coup Test)	1-5
Tear	1-4
Puncture	1-4
Cut (TDM-100 Test)	A-F
Impact Protection	P, F, X

P: Passed F: Failed X: Not Tested

EN 388 2016 edition added a second cut test, the ISO 13997 cut method, using the same TDM-100 machine as the ANSI Standard outlined in the ASTM F2992-15 test method. An alpha letter will appear within the new EN Shield indicating this extra score. The letter score will equate closely to the new ANSI score allowing customers to feel more comfortable about the two standards. The updated EN 388 2016 standard will also include an impact resistance test.

SCALE TO DETERMINE CUT SCORES

UNDERSTANDING THE ISO 13997 TEST METHOD

CONVERT

NEWTONS TO GRAMS

PIP has been testing all of its cut resistant gloves with the TDM-100 machine since 2005, which is (and has been) compliant with the new test method, enabling us to easily convert to the new EN 388 2016 standard. The table below illustrates how the new EN 388 2016 standard is now in-line with the ANSI/ISEA 105 standard for cut resistance when converting Newtons to grams.

EN 388 RATING	RANGE (NEWTONS)	CONVERTED RANGE (GRAMS)	ANSI/ISEA 105 LEVEL	RANGE (GRAMS)
EN CUT LEVEL A	2 - 4.9	204 - 508	ANSI CUT LEVEL A1	200 - 499
EN CUT LEVEL B	5 - 9.9	509 - 1,019	ANSI CUT LEVEL A2	500 - 999
EN CUT LEVEL C	10 - 14.9	1,020 - 1,529	ANSI CUT LEVEL A3	1,000 - 1,499
EN CUT LEVEL D	15 - 21.9	1,530 - 2,242	ANSI CUT LEVEL A4	1,500 - 2,199
EN CUT LEVEL E	22 - 29.9	2,243 - 3,058	ANSI CUT LEVEL A5	2,200 - 2,999
EN CUT LEVEL F	30+	3,059+	ANSI CUT LEVEL A6	3,000 - 3,999
---	---	---	ANSI CUT LEVEL A7	4,000 - 4,999
---	---	---	ANSI CUT LEVEL A8	5,000 - 5,999
---	---	---	ANSI CUT LEVEL A9	6,000+

CUT RISK HAZARD MATRIX™

CHOOSING THE RIGHT PROTECTION

THICKER, TOUGHER COATING

resists tears and protects against abrasion cuts when rough edge contact is part of the task

MAXIMUM GRIP COATING

necessary to prevent slippage and any chance of contact with sharp edges

10
HIGH

FORCE EXPOSURE

LOW
0

LIGHT to MEDIUM CUT HAZARDS

- Low gauge, thicker liner means more fabric loft to absorb and resist abrasion
- Spun yarns loftier to mitigate abrasion effects to skin
- TPR* impact protection to help protect against impact injuries

HIGH CUT HAZARDS

- Medium gauge, thicker liner to absorb pressing edge and allow yarn to roll
- Spun or high strength filament yarns

LIGHT CUT HAZARDS

- Low to medium gauge, thicker liner means more fabric loft to absorb and resist abrasion
- Spun yarns loftier to mitigate abrasion effects to skin

MEDIUM to HIGH CUT HAZARDS

- Higher gauge liner means more yarns per inch
- Filament yarns preferred as sharp edge slides across smooth yarn without catching to cut

0
ROUGH

EDGE SHARPNESS

10
RAZOR

YOUR GUIDE TO THE RIGHT CHOICE

INTRODUCING THE CUT RISK HAZARD MATRIX™

The **Cut Risk Hazard Matrix™** is a unique and logical method to guide users in selecting a glove or sleeve with the right cut resistant material and score. Once a safety manager can identify where their application fits on the **Cut Risk Hazard Matrix™**, they can more confidently correlate the task to the glove or sleeve best suited for their job.

We deemed it necessary to develop a unique approach to help determine the risk and possible severity of an injury.

CALCULATING THE CRH: FACTOR™

1. Assess the **EDGE SHARPNESS** with "Rough" equating to the edge of a brick and "Razor" to that of a sharp knife.
2. **FORCE** is relative to the different tasks being performed. Tasks such as deboning large animals require a high degree of force compared to working with box cutters in a repacking operation.
3. Mapping the two will place you in one of the four quadrants of **RISK** where you can determine your CRH: Factor™ and proceed to selecting the optimal coating for maximum grip.

CUT RISK HAZARD MATRIX™

CHOOSING THE RIGHT PROTECTION

THICKER, TOUGHER COATING

resists tears and protects against abrasion cuts when rough edge contact is part of the task

MAXIMUM GRIP COATING

necessary to prevent slippage and any chance of contact with sharp edges

WE'VE EQUATED CUT SCORE FACTORS WITH REAL WORLD TASKS AND APPLICATIONS AS EXAMPLES

By plotting the tasks and applications, we determine a **Cut Risk Hazard Factor™** (CRH: Factor™) as outlined on the right side. The CRH: Factor™ is a comparative indicator that helps safety managers determine the level of potential hazard related to the task or application.

CRH: FACTOR	TASK
9:10	HANDLING KNIVES IN MEAT PROCESSING AND PACKING
8:9	GLASS AND WINDOW MANUFACTURING AND INSTALLING
7:7	TILE AND GLASS WORK IN CONSTRUCTION
8:4	HANDLING LARGE SHARP PARTS, STAMPINGS AND CASTINGS
6:4	WORKING WITH WIRES AND METAL STRAPS
5:10	HANDLING SHARP HANDTOOLS IN CRAFTING AND PACKING
4:8	HANDLING AND ASSEMBLING SMALL SHARP PARTS
4:5	HANDLING SHEET METAL IN GENERAL FABRICATION AND CONSTRUCTION
3:3	HANDLING, ASSEMBLING AND SORTING SMALL PARTS

NEW PRODUCTS

COATED SEAMLESS KNIT GLOVES

G-Tek[®]
PolyKor[®]
XRYSTAL[™]

POLYKOR[®] XRYSTAL[™] IS AN ENGINEERED YARN THAT REPRESENTS THE NEXT GENERATION IN MAXIMUM CUT PROTECTION AND COMFORT.

It is a blend of high-modulus polyethylene and mineral-based fibers. These mineral-based fibers have a similar chemical composition to glass, but are inherently better in terms of strength, heat and oxidation resistance, as well as compression and shear.

G-Tek[®]
Supreme[™]

A BOLD NEW WORLD OF GRAPHENE-BASED FIBERS.

Similar to graphite, graphene is remarkably strong for its weight – being 100 times stronger than steel – it outperforms any other material. Structurally it is very different than other fibers in that it is made up of micro-structured graphene sheets well-aligned along the fiber axis.

G-Tek[®]
KEV[™]

KEVLAR[®] – A UNIQUE COMBINATION OF HIGH STRENGTH, HIGH MODULUS, & THERMAL STABILITY.

From athletes to astronauts, first responders to industrial workers, Kevlar[®] enables anyone, with an imagination and a job to do, to Dare Bigger[™]. PIP, the leading provider of coated seamless knit gloves in America teamed up with DuPont[®] to develop the new G-TEK[®] KEV[™] series of cut resistant gloves.

ATG[®]
Intelligent Glove Solutions

ATG[®] DESIGNS, DEVELOPS AND MANUFACTURES GLOVES WITH ENHANCED PERFORMANCE

All gloves are skin-friendly, extremely comfortable and highly durable.

ATG[®] introduces two new cut gloves based on advanced fiber technologies. DuPont[™] Kevlar[®] aramid fiber offers strength and light heat protection and Dyneema[®] Diamond based super thin liners offers unprecedented strength-to-weight ratio.

COATED SEAMLESS KNIT GLOVES

G-Tek
PolyKor
XRYSTAL™

Represents the latest iteration of PolyKor® in which it is combined with naturally hardened crystallized minerals. The result is a super tough, durable, cut resistant fiber that is at the peak of performance.

ANSI **A4** EN **5** NITRILE MICROSURFACE COATING

G-TEK® POLYKOR® XRYSTAL™ 16-X310

- Tough, flexible coating
- Excellent dry grip, and good grip in oily conditions
- Black coating on gray liner hides dirt

APPLICATIONS: *Electronics, Small Parts Handling, Construction, General Maintenance*

ANSI **A4** EN **5** NITRILE FOAM COATING

G-TEK® POLYKOR® XRYSTAL™ 16-X320

- High tactile and sensitive coating
- Excellent dry grip, and good grip in oily conditions
- Durable & hard-wearing coating
- Black coating on gray liner hides dirt

APPLICATIONS: *Electronics, Sheet Metal Handling, Parts Assembly, General Maintenance*

ANSI **A4** EN **5** NEOFOAM™ COATING

G-TEK® POLYKOR® XRYSTAL™ 16-X570

- Super durable cut resistant fiber
- Good grip on dry, wet or oily surfaces
- Tactile and flexible
- Touchscreen compatible
- Breathable, flexible coating
- Black coating on gray liner hides dirt

APPLICATIONS: *Glass Cutting, Metal Handling, Fastening, Construction*

ANSI **A4** EN **5** POLYURETHANE COATING

G-TEK® POLYKOR® XRYSTAL™ 16-X540

- Thin coating for maximum dexterity and tactile sensitivity
- Good grip on dry, wet or oily surfaces
- Black coating on gray liner hides dirt

APPLICATIONS: *Glass Cutting, Metal Handling, Fastening, Small Sharp Parts Handling, Construction*

IN CUT PROTECTION

HIGH CUT HAZARDS – INCISION RISK

COATED SEAMLESS KNIT GLOVES

G-TEK® SUPRENE™ 15-210

- Exceptionally strong liner
- Excellent dry grip, and good grip in oily conditions
- Black coating on gray liner hides dirt

APPLICATIONS: *Electronics, Glass Cutting, Metal Handling, Fastening, General Maintenance*

G-TEK® SUPRENE™ 15-215

- Extended coating coverage for better protection
- Excellent dry grip, and good grip in oily conditions
- Black coating on gray liner hides dirt

APPLICATIONS: *Heavy Duty Industrial, Metal and Castings Handling, Glass and Tile Work, General Maintenance*

G-TEK® SUPRENE™ 15-340

- Thin coating for precision and dexterity
- Good grip in dry, wet, and slightly oily conditions

APPLICATIONS: *Glass Cutting, Metal Handling, Fastening, Construction*

G-TEK® SUPRENE™ 15-440

- High breathability coating for maximum comfort
- Good grip in dry, wet, and slightly oily conditions
- Touchscreen compatible
- Breathable, flexible coating
- Black coating on gray liner hides dirt

APPLICATIONS: *Glass Cutting, Sheet Metal Handling, Fastening, Small Sharp Parts Handling, Construction*

G-Tek®
Suprene™

Latest breakthrough in nanofabrication has resulted in Suprene™ – an affordable fiber with unparalleled strength and physical properties.

HIGH CUT HAZARDS – INCISION RISK

COATED SEAMLESS KNIT GLOVES

G-Tek® 3GX®

Embedded micro-particles strengthen fibers by up to two times, for higher cut scores. 3GX® offers cool touch comfort and are lightweight for improved productivity.

ANSI **A4** EN **5** NITRILE FOAM COATING

**G-TEK® 3GX®
19-D340LG**

- High tactile sensitivity and dexterity
- Excellent dry grip and resistance to oils
- High puncture resistance for industrial applications
- Excellent durability

APPLICATIONS: *Handling Metal Parts, Assembly, Fastening, Industrial Construction*

ANSI **A4** EN **5** LATEX CRINKLE COATING

**G-TEK® 3GX®
19-D313**

- Heavy duty, tough wearing performance
- Superior grip in dry and slightly wet, non-oily conditions
- High puncture resistance
- Good durability

APPLICATIONS: *Ceramics, Glass and Sheet Metal Handling, Construction, General Maintenance*

STRONGER. SAFER. BETTER. CUT PROTECTION WITH DYNEEMA® DIAMOND TECHNOLOGY

HIGH CUT HAZARDS – INCISION RISK

COATED SEAMLESS KNIT GLOVES

HI-VISIBILITY

**G-TEK® 3GX®
19-D340OR**

- High tactile sensitivity and dexterity
- Excellent dry grip and resistance to oils
- High puncture resistance for industrial applications
- Excellent durability

APPLICATIONS: *Handling Metal Parts, Assembly, Fastening, Industrial Construction*

**G-TEK® 3GX® BLACK
19-D534B**

- Tough wearing, oil and solvent resistant coating
- Good cut protection and tactility
- Good dry grip, fair grip in oily conditions

APPLICATIONS: *Glass Cutting, Construction, Fastening, Metal and Castings, General Maintenance*

G-TEK® 3GX® WITH DYNEEMA® DIAMOND TECHNOLOGY

**G-TEK® 3GX® BLACK
19-D526B**

- Black liner hides dirt and extends life of glove
- Good cut protection and tactility
- Good grip in dry, wet and slightly oily conditions

APPLICATIONS: *Electronics, Glass Cutting, Metal Handling, General Maintenance, Small Parts Handling*

**G-TEK® 3GX®
19-D330**

- High tactile sensitivity and dexterity
- Good grip in dry, wet, and slightly oily conditions
- Excellent durability

APPLICATIONS: *Electronics and Metal Assembly, Small Sharp Parts Handling*

Made in the U.S.A., Kut Gard® seamless knit gloves are designed to provide the highest possible cut protection and because they comply with both the US and Canadian standards for food contact, Kut Gard® gloves can be used for operations where direct, indirect, and incidental contact with food may occur.

**KUT GARD®
WITH DYNEEMA®**

Dyneema® is 15 times stronger than steel on a weight for weight basis! It's a High Performance Polyethylene (HPPE) fiber made from Ultra-High Molecular Weight Polyethylene (UHMWPE). Dyneema® fiber is much thinner and more flexible than traditional materials, such as leather and cotton, while offering higher protection.

**KUT GARD®
PolyKor®**

Products constructed with PolyKor® engineered yarn are suitable for protection against mechanical hazards in the toughest environments. PolyKor® products can be designed for different protection levels, up to the highest levels, while maintaining an unprecedented level of comfort.

**KUT GARD®
MADE WITH
KEVLAR®**

Kevlar® is light, comfortable and provides enduring protection against heat, cuts, lacerations and abrasions. Protective gloves and sleeves bearing this brand name provide assurance of compliance to strict performance and quality standards, and are produced only by Kevlar® licensed manufacturers.

**KUT GARD®
ACP™**

Proprietary ACP™ Technology raises the standards for performance knit products offering an increase in overall performance and value compared to traditional Aramid products. ACP™ provides excellent abrasion and cut resistance for lower cost per use. ACP™ Technology gloves and sleeves are 100% silicone free.

- Superior abrasion and fatigue resistance
- 100% silicone free

APPLICATIONS: *Automotive Manufacturing, Metal Fabrication, Assembly, Plastic Molding, Glass Handling, Food Processing, And Metal Stamping*

◀ KUT GARD® 14-ASP700PDD

- Excellent cut resistance to protect against minor cuts and scrapes
- Exceptional comfort and fit
- Double-sided PVC dots provided enhanced grip and extra cut and abrasion resistance
- 100% silicone free

APPLICATIONS: *Automotive Manufacturing, Metal Fabrication, Assembly, Plastic Molding, Glass Handling, Food Processing, And Metal Stamping*

DOUBLE-SIDED PVC DOT GRIP

◀ KUT GARD® 07-KA710

- Excellent cut resistance
- Light heat protection
- Ambidextrous
- Heavier gauge for increased durability

APPLICATIONS: *Sheet Metal Fabrication, Recycling, Metal Fabrication, Pulp and Paper Processing*

NEW PRODUCTS

COATED SEAMLESS KNIT GLOVES

G-Tek

NEW

GENERAL PURPOSE FROM PIP

NEOFOAM™
COATING

NEWEST INNOVATION IN
THE G-TEK® 34 SERIES OF
GENERAL PURPOSE GLOVES

The 34-600 features our proprietary Neofoam™ coating technology with superior grip in dry, wet and oily surface conditions. Flexible to -4°F and resists up to 12,000 cycles on abrasion test, this breathable highly dexterous glove is the new “go-to” glove for all jobs.

LATEX
MICROSURFACE
COATING

100% WATERPROOF

For jobs that require a little more palm and finger coverage, but still require grip and dexterity, there's the 55-1600. With a double-dipped latex MicroSurface grip, the coating is completely waterproof and extremely abrasion resistant. But, workers can still grab objects with ease while enjoying the all-day comfort of the nylon shell.

NITRILE
FOAM GRIP
COATING

COLD GLOVES AND WORK
GLOVES COMBINED INTO ONE

The new 41-1415 has the double-dipped, full coverage coating needed to provide workers with protection and a superior grip in wet dry and oily conditions, while an acrylic liner provides excellent protection in cold environments.

LATEX CRINKLE
COATING

THE IDEAL COLD WEATHER
WORK GLOVE

The 14-1425 is constructed with a Hi-Vis acrylic shell for easy detection while providing economical cold weather insulation without trapping in moisture. A latex crinkle coating gives workers an excellent grip in wet or dry and remains flexible in extreme cold conditions.

◀ 68-101

- Cowhide leather construction provides comfort, durability, excellent abrasion resistance, and breathability
- Straight thumb increases comfort in close-fisted work

APPLICATIONS: *Pipe, Brick, Material Handling, Construction, Farming, General Maintenance*

◀ 70-368

- Pigskin leather becomes softer with use and withstands moisture without stiffening
- Keystone thumb is ergonomic, providing better dexterity
- Breathable for added comfort

APPLICATIONS: *Construction, Machine Operation, Utility Work, General Maintenance*

◀ 71-3618

- Goatskin leather is the most abrasion resistant leather
- Keystone thumb is ergonomic, providing better dexterity

APPLICATIONS: *Construction, Machine Operation, Utility Work, General Maintenance*

TRIED & TRUE PROTECTION

HI-VIS FINGERTIPS

◀ 68-165HV

- Cowhide leather construction provides comfort, durability, excellent abrasion resistance, and breathability
- Keystone thumb is ergonomic, providing better dexterity
- Hi-Vis color on fingertips and "Watch Your Hands" logo for visibility

APPLICATIONS: *Pipe, Brick, Material Handling, Construction, Farming, General Maintenance*

◀ 70-301

- Pigskin leather becomes softer with use and withstands moisture without stiffening
- Straight thumb increases comfort in close-fisted work
- Breathable for added comfort

APPLICATIONS: *Construction, Machine Operation, Utility Work, General Maintenance*

◀ 71-3601

- Goatskin leather is the most abrasion resistant leather
- Keystone thumb is ergonomic, providing better dexterity

APPLICATIONS: *Construction, Machine Operation, Utility Work, General Maintenance*

GENERAL PURPOSE GLOVES

SPLIT LEATHER PALM

LEATHER GLOVE CLASSIFICATION

PLATINUM

- Leather palm gloves constructed of heavy side-split cowhide
- Rugged extra strength back and cuff
- Stitched with Kevlar®, adding strength and heat resistance

GOLD

- Leather palm gloves constructed of Grade A select shoulder-split cowhide
- Excellent quality and very affordable

SILVER

- Leather palm gloves constructed of Grade A/B shoulder-split cowhide
- Best value grade of leather palms

BRONZE

- Leather palm gloves constructed of Grade B shoulder-split cowhide
- High quality and outstanding value
- Size large is sized larger than most competitive gloves

COPPER

- Leather palm gloves constructed of Grade B/C split cowhide
- Consistent quality at an affordable price
- Cotton color binding denotes sizes

ECONOMY

- Leather palm gloves constructed of the most economical split cowhide available in the market today

SPLIT LEATHER PALM

STITCHED WITH KEVLAR®

80-8844

- Constructed of heavy side-split cowhide
- Cotton lined palm for extra comfort
- Wing thumb increases comfort in open-handed work
- Gunn cut pattern delivers excellent durability, wear and comfort

APPLICATIONS: *Construction, Road Work, Excavation, General Maintenance*

COTTON LINED PALM

82-7663

- Constructed of Grade A/B shoulder-split cowhide
- Gunn cut pattern delivers excellent durability, wear and comfort
- Fabric back provides breathability and flexibility
- Leather knuckle strap and finger tips for extra protection

APPLICATIONS: *Construction, Road Work, Excavation, General Maintenance*

COTTON LINED PALM

83-6563

- Wing thumb increases comfort in open-handed work
- Leather knuckle strap and fingertips provide additional protection
- Safety cuff helps protect wrist and allows for fast removal

APPLICATIONS: *Construction, Road Work, Excavation, General Maintenance*

GENERAL PURPOSE GLOVES

SPLIT LEATHER PALM

CHEMICAL RESISTANT GLOVES

POLYMER TECHNOLOGY

DESIGN FACTORS:

- Supported (liner) for added puncture resistance, durability and comfort
- Unsupported (no liner) for dexterity, hygiene and cleanliness
- Thickness of polymer alone or polymer/liner
- Wrist length and shape
- Coating variants range from ¾-dipped to fully coated
- Coating textured for enhanced grip

POLYMER TECHNOLOGY GENERAL USE GLOVES,
BUILT FOR SUPERIOR LIQUID AND CHEMICAL RESISTANCE

POLYMER TECHNOLOGY GLOVES MAY BE SUPPORTED OR UNSUPPORTED.

- **Supported** gloves are made by dipping a knit or woven cloth liner into a liquid polymer for coating. The liner "supports" the coating and adds strength.
- **Unsupported** gloves are made on hand formers that are dipped directly into a liquid polymer compound and stripped off when cured.

POLYMER MATERIALS

LATEX

ADVANTAGE

- Good resistance to numerous acids and ketones
- Flexible, tear and snag resistant

PRECAUTION

- Avoid contact with hydrocarbon based oils or solvents
- Latex intolerance with some users

NITRILE

ADVANTAGE

- Good resistance to hydrocarbon derivatives
- Tough and resistant to abrasion, snags and perforation

PRECAUTION

- Smooth finish not recommended in oily conditions

NEOPRENE

ADVANTAGE

- Broad range resistance to acids, alcohols, fats, caustics, refrigerant, ketones and detergents
- Tough and resistant to abrasion, snags and perforation

PRECAUTION

- Degrades with some common chemicals such as bleach

PVC

ADVANTAGE

- Resists diluted aqueous solutions of bases or acids
- Reliable resistance to oils and organic solvents

PRECAUTION

- Less flexible, tacky and susceptible to snagging

CHEMICAL RESISTANT GLOVES

UNSUPPORTED LATEX

Assurance[®]

FOR GENERAL MAINTENANCE APPLICATIONS

CHEMICAL RESISTANT GLOVES

UNSUPPORTED LATEX

STRAIGHT CUFF

ASSURANCE® 47-L170Y

- Raised diamond pattern for enhanced grip in wet or dry conditions
- Made with component materials that comply with federal regulations for food contact 21 CFR 170-199
- CFIA approved

APPLICATIONS: *Food Processing, Janitorial, Maintenance, Poultry*

PINKED CUFF

ASSURANCE® 48-L185B

- Honeycomb pattern for enhanced grip
- Made from component materials that comply with Federal Regulations for food contact 21 CFR, 170-199
- Flock lining provides easy on and off, plus moisture absorption
- Pinked cuff for tear resistance

APPLICATIONS: *Janitorial, Maintenance, Sanitation*

ROLLED CUFF

ASSURANCE® 47-L210T

- Roughened sandblast pattern for enhanced grip in wet conditions
- Longer cuff for additional forearm protection
- Made with component materials that comply with federal regulations for food contact 21 CFR 170-199

APPLICATIONS: *Janitorial, Maintenance, Diluted Acids and Caustic Solutions*

PROVIDES COMFORT AND FLEXIBILITY ALONG WITH MAXIMUM FINGERTIP TACTILE SENSITIVITY NOT FOUND IN OTHER CHEMICAL RESISTANT PRODUCTS

BLENDED POLYMER ON ULTRA FINE GAUGE SEAMLESS KNIT NYLON LINER

EXCLUSIVE GRIPTECH® COATING OFFERS NON-SLIP CAPABILITIES

LIQUITECH® BARRIER TECHNOLOGY PROVIDES RESISTANCE TO OILS AND LIQUIDS

LIQUID RESISTANT GLOVES

COATED SUPPORTED STYLES

LIQUID PROTECTION

PROCOAT®

GREAT FOR OILY & WET CONDITIONS

SMOOTH GRIP
COATING

58-8030Y

- Single-dipped construction
- Jersey liner provides better comfort
- Yellow color allows for glove degradation to be easily identified

APPLICATIONS: *Mining, Construction, Refining, Petrochemicals & Handling Oily Materials*

SEMI-ROUGH
COATING

58-8015R

- Single-dipped construction
- Semi-rough finish provides better grip in wet conditions
- Interlock lining dries quickly and offers better dexterity

APPLICATIONS: *Mining, Construction, Refining, Petrochemicals & Handling Oily Materials*

SANDY GRIP
COATING

58-8414R

- Double-dipped coating for superior liquid protection and extended wear
- Sandy finish provides better grip in wet conditions
- Jersey liner provides better comfort
- Longer cuff for additional forearm protection

APPLICATIONS: *Mining, Construction, Refining, Petrochemicals & Handling Oily Materials*

LONGER CUFF

LIQUID RESISTANT GLOVES

COATED SUPPORTED STYLES

58-8120DD

- Double-dipped coating for superior liquid protection and extended wear
- Sandy finish provides better grip in wet conditions
- Interlock lining dries quickly and offers better dexterity

APPLICATIONS: *Mining, Construction, Refining, Petrochemicals & Handling Oily Materials*

58-8035DD

- Double-dipped coating for superior liquid protection and extended wear
- Coating provides better grip in wet conditions
- Jersey liner provides better comfort

APPLICATIONS: *Mining, Construction, Refining, Petrochemicals & Handling Oily Materials*

58-8658K

- Kevlar® liner provides cut and light heat protection
- Seamless knit construction for enhanced dexterity and comfort
- Oil and liquid resistant

APPLICATIONS: *Mining, Construction, Refining, Petrochemicals & Handling Oily Materials*

CHEMICAL RESISTANT GLOVES

SELECTOR GUIDE

ONLINE SELECTOR GUIDE: MATCHES GLOVE TO CHEMICAL FOR MAXIMUM SAFETY

PIP offers a user-friendly Selector Guide for Chemical Protection. The Chemical Permeation Guide allows you to search by chemical name, CAS number or by PIP glove style.

The chemical permeation of our product is measured in accordance to European Standard EN 374-3. This measures the resistance of protective gloves against chemicals and microorganisms. Part 3 of the standard determines the level of resistance to permeation by chemicals.

www.pipusa.com

EN 374-3

AJK

WHAT IS THE ALPHA CODING LISTED BELOW PICTOGRAM?

EN 374-3 coding - In order for a glove to receive the pictogram as shown, the glove must achieve a breakthrough time >30 minutes for at least 3 chemicals from the 12 listed below.

BREAKTHROUGH TIME (BTT)

The number of minutes from initial contact with a test chemical until it is first detected on the inside of the glove

BREAKTHROUGH TIME - PROTECTION INDEX

Each chemical tested is classified in terms of breakthrough time (performance level 0 to 6)

PROTECTION INDEX

>	10 Minutes	Class 1
>	30 Minutes	Class 2
>	60 Minutes	Class 3
>	120 Minutes	Class 4
>	240 Minutes	Class 5
>	480 Minutes	Class 6

CODE LETTER	CHEMICAL	GAS NUMBER	CATEGORY
A	Methanol	67-56-1	Primary alcohol

I	Ethyl acetate	141-78-6	Ester
J	n-Heptane	142-85-5	Saturated hydrocarbon
K	Sodium hydroxide 40%	1310-73-2	Inorganic base
L	Sulfuric acid 96%	7664-93-9	Inorganic mineral acid

DISPOSABLE GLOVES

POLYMER TECHNOLOGY

POLYMER TECHNOLOGY DISPOSABLE GLOVES, BUILT FOR LIQUID AND CONTACT PROTECTION

THE KEY TO PERFORMANCE IS SELECTING POLYMER MATERIAL AND THICKNESS

POLYMER MATERIALS

POLYMER COATING	ADVANTAGE	PRECAUTION
LATEX	- Superior flexibility and resistance to animal fats - Often used in cleaning, inspection, laboratory, and other light duty applications	- Latex intolerance with some users
NITRILE	- Good resistance to hydrocarbon derivatives as well as natural fats, oils and proteins. - Tough and resistant to abrasion, snags and perforation	- Avoid prolonged contact with ketones and aromatic solvents
VINYL	- Popular choice within the food industry as cost effective alternative for certain light duty tasks	- Less durable than nitrile or latex
POLYETHYLENE	- Most economical choice and is often used in food preparation	- Loose fitting and least durable

MIL THICKNESS

A "MIL" IS A UNIT OF THICKNESS EQUAL TO ONE THOUSANDTH OF AN INCH.

MIL	RECOMMENDED USE
13	- Exceptional tear and snag resistance for use in First Responder EMS or heavy duty industrial applications
5 to 8	- Food preparation, cleaning tasks, tattooing and industrial applications
3 to 4	- Single use food preparation and light duty
1 to 2	- Tasks that require constant glove change-outs such as in food service preparation

POWDERED: Lightly dusted with cornstarch or other dry lubricants to make donning gloves easier. Can leave residual traces on surfaces affecting adhesion or paint bonding in manufacturing. Banned for use in Medical, Surgical or Examination applications.

POWDER-FREE: Manufactured using a chlorination process that creates a less tacky glove surface facilitating donning and leaving no residual traces on surfaces.

CONTROLLING CONTAMINATION

WHILE MORE THAN 30 DIFFERENT INDUSTRY SEGMENTS UTILIZE CLEANROOMS, 70% OF U.S. CLEANROOM FLOOR SPACE IS IN THE PHARMACEUTICAL, BIOTECHNOLOGY, SEMICONDUCTOR AND OTHER ELECTRONIC COMPONENT INDUSTRIES.

THERE ARE FOUR MAIN GROUPS OF CONTAMINANTS:

Particles, usually carried on air currents, are solid matter, such as human skin flakes, dust and fibers from clothing, particles from production materials or from tooling and equipment.

Microorganisms such as bacteria can be extremely dangerous if they are allowed to contaminate medicines or people that treat or are being treated.

Chemicals can react with the product and cause changes to the formulation or destroy the product.

Electrostatic discharge given off by the human body can be as high as 35,000 volts. The energy attracts particles and, as these particles colonize in one place, they cause particulate damage. The discharge itself can also cause severe damage.

CRITICAL ENVIRONMENT GLOVES

CLEANTEAM® SEAMLESS KNIT GLOVES FOR FINE WORK

◀ **CLEANTEAM® 40-C125**

- Polyurethane coated palm and fingers to provide puncture and abrasion resistance while offering excellent tactile sensitivity
- Comfortable seamless knit design provides superior comfort and dexterity

APPLICATIONS: *Product Handling, Finishing, Assembly, Electronics Assembly, Photography Labs, Computer Manufacturing*

◀ **CLEANTEAM® 40-130**

- Made in the USA
- Low linting
- Polyester can be UV irradiated to sterilize

APPLICATIONS: *Paint Rooms, Electronic Assembly, Pharmaceutical Production*

◀ **CLEANTEAM® 40-6415**

- Excellent properties in electrostatic dissipation, electromagnetic wave shielding and thermal conductance
- Copper fiber provides good thermal conductance

APPLICATIONS: *Circuit Board Manufacturing, Munitions, Electronics Assembly, Aerospace*

◀ **CLEANTEAM® 40-730**

- Lightweight design can be worn under disposable and other liquid-proof gloves
- Nylon yarns absorb perspiration and leave hands cool and comfortable

APPLICATIONS: *Product Handling, Finishing, Assembly, Electronics Assembly, Photography Labs, Computer Manufacturing*

◀ **CLEANTEAM® 40-6410**

- Electrostatic Dissipative (ESD) fiber yarns blended with low lint nylon which reduces static build-up on the glove surface
- Seamless knit gloves provide great dexterity
- Launderable and reusable without losing ESD properties

APPLICATIONS: *Circuit Board Manufacturing, Munitions, Electronics Assembly, Aerospace*

EXTREME TEMPERATURE / MATS & PAPER

EXTREME TEMPERATURE PROTECTION

▲ 202-1027 ▲ 202-1019 ▲ 202-1015 ▲ 202-1012

TEMP-GARD® LIQUID-PROOF SILICONE EXTREME TEMPERATURE GLOVE

IDEAL FOR USE IN WORK ENVIRONMENTS TO PROTECT FROM EXTREME TEMPERATURES OF -321°F (-196°C) TO +500°F (+260°C), SUCH AS CRYOGENIC CLEANING, CRYOGENIC SYSTEMS MAINTENANCE, CONSERVATION OF FOOD PRODUCE

- Impervious to cryogenic liquids and most other liquids and chemicals
- Exceptional grip that does not become slippery, even at extreme temperatures
- Superior flexibility that will not stiffen
- Improved dexterity at all temperatures
- Easy to clean, will not absorb chemicals and will not stain. The silicone coating is on the outside of the gloves (rather than inside), so it prevents staining and can easily be rinsed off after use

ITEM NUMBER	COLOR	MATERIAL	LENGTH	SIZES

HIGH PERFORMANCE **TASK SPECIFIC PROTECTION**

THE NEED FOR MULTI-FACETED PROTECTION IS SOMETHING ONLY CUT AND SEWN GLOVES, USING ADVANCED, COMPOSITE MATERIALS CAN ACHIEVE. KEY MARKETS THAT ARE IN NEED OF TASK SPECIFIC GLOVES ARE OIL & GAS, CONSTRUCTION, ELECTRICAL AND GAS UTILITY, AND MECHANICAL TRADES.

EACH OF THESE MARKETS HAS SPECIFIC NEEDS

Impact Resistance

Impact resistant gloves aim to reduce injury from blunt force against the top of the hand and fingers. Thermoplastic Rubber (TPR) is the common material found on impact resistant gloves to reduce top of hand injuries. Key applications include: Oil & Gas, Heavy Industry, Mining, Trench Work and Construction

Flame & Heat Resistance

Covers everything from Flame Resistance, Arc Protection, Hot Mill and Welder's gloves, as well as gloves certified for fighting structural fires.

Cold Protection

Gloves for working in cold climates or in refrigerated warehouses rely on thermal lining or winterized membranes.

Ergonomic Design

Advancement in pattern engineering software and sewing machinery combine to produce gloves that mimic the natural hand. When constructed with advanced, composite materials, task specific gloves offer features that can solve almost any hand protection problem.

MAXIMUM SAFETY® 73-1703

- Inherently FR Nomex® material used in construction of glove
- Kevlar® lined and stitched for light heat and cut protection
- Fourchettes between the fingers provide a better fit
- Double palm enhances comfort and protection
- Reinforced thumb joint provides added durability

APPLICATIONS: *Material Handling, Stamping, Grinding, Cut Resistance, Multitasking Where Welding Could Be Part of the Task*

MAXIMUM SAFETY® 39-C1375

- Seamless knit construction is comfortable and flexible
- Latex crinkle coating provides superior grip in dry and wet, non-oily conditions
- Ergonomic shaped finger pattern reduces hand fatigue
- Fabric back provides breathability and flexibility
- Launderable

APPLICATIONS: *Light Construction, Auto Repair, Manufacturing, Fabrication Landscaping*

MAXIMUM SAFETY® 120-4800

- Provides high abrasion resistance and tactility
- 3M™ Thinsulate™ lining provides superior insulation without the bulk of fleece
- PVC diamond grip pattern on fingers and palm for enhanced grip
- Neoprene pad provides additional knuckle protection
- Breathable, waterproof liner keeps hands dry and comfortable
- Fourchettes between the fingers provide a better fit

APPLICATIONS: *Cold Weather Work, Petrochemical, Construction, Manufacturing, Mining, Fabrication*

TERRYCLOTH LOOP-OUT DESIGN

◀ 94-928G

- Multi-layer construction provides comfort, insulation, and superior heat protection
- Burlap lining creates an air pocket providing increased heat protection
- Knuckle strap for enhanced protection
- Gauntlet cuff for additional forearm protection

APPLICATIONS: *Forging, Hot Metal Handling, Castings, Molds and other operations that require heat protection*

◀ 42-C700

- Seamless construction offers increased comfort and breathability
- Provides comfortable resistance to cuts, abrasions and heat
- Loop out design helps protect against intermittent contact with hot surfaces
- Ambidextrous pattern

APPLICATIONS: *Operations that require heat and abrasion protection*

◀ 42-853

- Seamless construction offers increased comfort and breathability
- Provides comfortable resistance to cuts, abrasions and heat
- Loop out design helps protect against intermittent contact with hot surfaces
- 13" length provides additional forearm protection
- Double-insulated for excellent thermal protection

APPLICATIONS: *Food Service, Bakeries*

FUNDAMENTALS OF **ARM PROTECTION**

WHEN WEARING CUT RESISTANT GLOVES, ALSO CONSIDER ARM PROTECTION TO EXTEND YOUR SAFETY COVERAGE AND PROTECT AGAINST OTHER POTENTIAL INJURIES. WHETHER YOU HANDLE LARGE AND/OR SHARP OBJECTS, ARE EXPOSED TO SPARKS, OR JUST NEED TO HAVE YOUR FOREARMS COVERED, PROTECTIVE SLEEVES CAN PROVIDE VARIOUS SOLUTIONS TO MEET YOUR SAFETY NEEDS.

APPLICATIONS

The most common application need for arm protection is **cut resistance**. In addition to **cut protection**, you can also achieve options that provide:

- **Maximum comfort**
- **Heat protection**
- **Food handling Capabilities**
- **Arc-rated protection**

Several customizable options are also available to help maximize protection by ensuring the sleeve stays in place as consistently as possible.

- Options such as **thumb holes** or **thumb slots** can help hold the sleeve up to the heel of your hand.
- Options can also help hold the sleeve up on your arm, such as **elastic bands** or **hook and loop closures**.

PRODUCTION

PIP manufactures sleeves in our facilities in Bluffton, IN and Chaska, MN, and we take pride in providing what we consider to be the most comprehensive offering of arm protection. And, because we manufacture these great products domestically, we have the ability to **custom make sleeves** for your particular application. See Page 146 for more details.

SMART FIT™ TECHNOLOGY SLEEVES

ONE-SIZE-FITS-ALL COMFORT

QUICK TUG
ADJUSTING KNIT

SMART-FIT™ ONE-SIZE-FITS-ALL

2x1 KNIT SMART FIT™ SLEEVE

A one size fits all technology. Smart Fit™ technology provides workers of all arm sizes to wear the same size sleeve and enjoy comfortable, form-fitting all-day protection.

STRETCH TO FIT ANY SIZE

Whether large or small, Smart Fit™ is designed to cover and protect the most commonly exposed areas of a worker's arm. Worn on a bare arm, or over layers, a single sleeve is right for most jobs.

PLUSH TOP OPTION

Only Smart Fit™ sleeves are available with a plush top cuff option that comfortably and securely fits without the need to fasten or adjust.

BRINGING THE BEST OF THE WORLD TO YOU®

PERSONAL PROTECTIVE EQUIPMENT

UNDERSTANDING HEAD PROTECTION

PIP PROVIDES A COMPREHENSIVE OFFERING OF HEAD PROTECTION, INCLUDING HARD HATS, HELMETS, AND BUMP CAPS. WHEN SELECTING A HARD HAT, THE FIRST CONSIDERATION IS WHETHER YOU NEED ANSI TYPE I OR TYPE II PROTECTION, BASED ON OSHA REQUIREMENTS FOR YOUR GIVEN JOB AND/OR ENVIRONMENT. TYPE II MEETS REQUIREMENTS FOR ADDED SIDE IMPACT AND PENETRATION PROTECTION.

HARD HAT STYLES

Hard hats come in cap style and full brim, and both are available in vented and non-vented options.

- **Cap Style** hard hats shade your face and eyes.
- **Full Brim** hard hats shade your face, eyes, ears, and neck.
- **Non-Vented** Evolution® hard hats in this section meet **Class E** (Electrical) protection.
- **Vented** Evolution® hard hats in this section meet **Class C** (Conductive) protection. The vented option provides a cooler, more comfortable experience, though they are not intended for use near electrical hazards.

The size of the hard hat can be adjusted either by wheel ratchet or slip ratchet, depending on the option selected.

- The **wheel ratchet** provides a quicker and easier adjustment.
- The **slip ratchet** is a more economical solution that is still simple to adjust.

Class E (Electrical) protection means the hard hat is proof-tested at **20,000 volts**.

Class G (General) protection means the hard hat is proof-tested at **2,200 volts**.

Class C (Conductive) protection means the hard hat is not intended for use near electrical hazards, but is vented for breathability.

SPECIALTY HEAD PROTECTION

Specialty **helmets** are available for several industries, including fire, rescue, wildland, and high altitude workers, among others. These specialty helmets meet the stricter requirements for those specific work environments.

When head protection is not required but the risk of head injury persists, **bump caps** should be considered. While they are not ANSI rated, bump caps can help protect against incidental bumps and scrapes, especially if you're working in areas with a low vertical clearance. The low-profile baseball cap style increases user acceptability, giving workers a comfortable option that they will want to wear. Ranger style is ideal for outdoor workers, providing additional shade from the sun's UV rays.

280-AHS240V-10	■ White	Cap	Vented

IMPACT PROTECTION

Side, front and rear impact protection from the shock absorbing Expanded Polystyrene (EPS) impact liner meets **ANSI Type II standards**. Offers 20 times the coverage area of a Type I hard hat.

SUPREME COMFORT

Deluxe polyester textile strap suspension with a microfiber crown pad. Lightweight EPS liner reduces total weight to 19 ounces, while still offering maximum protection.

TOUGH OUTER SHELL

High strength outer shell with ribbed channels running across the top to dissipate impact energy. All around protection down 60° from vertical. Large imprint area on front "shield."

FIRM FIT ADJUSTMENT

Intuitive thumb and forefinger press points for easy adjustment of the wheel ratchet. The Linesman has an ANSI approved chin strap for retention on a Type II hard hat.

The three-rib design is a registered trademark of E.D. Bullard Company and used under license.

EVOLUTION® 6100 SERIES - TYPE I HARD HATS

CAP STYLE

TRADITIONAL STYLING WITH ENHANCED STRENGTH AND PROTECTION

FIVE RAISED CHANNELS

Modernizes the aesthetic look, but also strengthens the hard hat

FRONT BRIM OPTIONS

Available in a short 1/2" brim style in addition to regular 1" cap style brim

10%
MORE

EXTRA PROTECTION ZONE

Provides 10% more coverage at the back/sides of the head and neck for extra deflection protection

FULL BRIM

FOR ADDITIONAL PROTECTION AGAINST SUN, GLARE, RAIN AND FALLING DEBRIS

SHORTER FRONT BRIM

Shades the face while allowing excellent visibility

LONGER BACK BRIM

Helps protect neck and ears from the sun's UV rays, and functions as a run-off for rain and snow

TEXTURED UNDERSIDE

Helps reduce reflection and glare off the brim

PRE-ASSEMBLED

All JSP® hard hats are packed ready-to-wear with no assembly of the 6-point suspension required.

TOUGH HDPE SHELL

Modern design is enhanced with five raised channels that run across the top of the head down to the extended back area.

3D PRECISION FITTING

Never before has such a precise fit been attainable on an industrial safety hard hat, using the unique 3-position harness depth setting.

VENTILATION OPTION

Allows air movement inside the shell. This can reduce the inside hat temperature by an average of 4-6°F. Ideal when using cooling products.

JSP®

HARD HAT ACCESSORIES

REFLECTIVE DECALS

FULL REFLECTIVE COVERAGE

PROTECTION DAY & NIGHT

CR2 REFLECTIVE DECAL KITS FOR JSP® EVOLUTION® HARD HATS

Easy for user to apply; sold in packs of 10 applications

- Class R2 reflective material offers significantly more brightness than standard reflective material
- High-intensity prismatic pattern features enhanced brightness day or night, and better visibility in all weather conditions
- Offers full 360° reflective coverage, plus strips on top
- Six reflective colors are available in both a cap-style and full-brim configuration
- Decal colors can be used to indicate function, while stocking only a basic white hard hat
- Ideal for hazardous environments where workers must be seen: construction, mining, highway, civil engineering or offshore

Ultra-sleek design means the HardCap A1+™ is almost indistinguishable from a low-profile baseball cap.

ALL AROUND PROTECTION

The HDPE liner provides protection from front-to-back and side-to-side. The liner is also removable so the outer cap can be washed.

UNIQUE SIZE ADJUSTER

Unique size adjuster slides on an elastic strip to give a quick, secure fit. Angled downward to fit under nape of neck.

SWEATBAND

Terrycloth sweatband adds comfort and absorption for the wearer.

REFLECTIVE PIPING

Reflective piping adds extra visibility and therefore safety in all working environments.

VENTILATION

Holes in the liner match up with mesh panels on the cap to provide added ventilation for coolness and comfort.

Bump Caps are **NOT** designed for use in ANSI hard hat designated areas

AVOID BUMPS & SCRAPES

Getting workers to wear head protection can be tough, especially in areas where hard hats are not required. It's estimated that a third of all impact injuries to the head are suffered by workers who bumped into stationary objects while not wearing any head protection. The sporty baseball cap style of the HardCap A1+™ is sure to increase wearer acceptability and reduce injuries.

WINTER LINERS

FR TREATED

WINTER LINERS FEATURES & BENEFITS

MATERIAL & CONSTRUCTION

Winter liners are available in 1, 2, or 3 layer constructions.

OUTER LAYERS

Cotton Twill

Polyester (Quilted)

Polyester Fleece

INNER LAYERS

Fleece

Sherpa Pile Fleece

LENGTHS

Regular Length (Shorty):

Hits at base of head

Mid-Length (Middy)

Hits just below nape of neck

Shoulder Length (Extended):

Wraps around to front and can be tucked into jacket

FR TREATMENT

• FR Treated (Outer shells only):

- Outer shell tested to retain their FR characteristics for 1, 10, or 30 washes

• Non-FR:

- Hats, caps and a few select winter liners are not treated for use in applications that do not require the added protection

USE WITH **NEW HEAT PACKS** | PAGE 119

HEARING PROTECTION & WHY IT'S CRITICAL

WHEN THE NOISE LEVELS OF A WORK ENVIRONMENT EXCEED 85 DECIBELS (dB), THE RISK OF HEARING LOSS BECOMES VERY PREVALENT AND HEARING PROTECTION SHOULD BE WORN. AT THE SAME TIME “TOO MUCH” HEARING PROTECTION CAN ALSO BE DANGEROUS, AS IT RESTRICTS THE WEARER FROM HEARING THEIR COLLEAGUES OR MOVING VEHICLES IN THEIR WORK AREA. TAKING THIS INTO CONSIDERATION, THE IDEAL NOISE LEVEL IS 70-85 dB.

Hearing loss is both cumulative and gradual, meaning hearing can continually worsen and that it is difficult for someone to be aware of if they are losing their hearing. Therefore, it is critical to wear hearing protection to better sustain one's hearing. By preserving the hearing one has, they help reduce the impact of hearing loss in their day-to-day life.

HEARING PROTECTION OPTIONS: EAR PLUGS AND EAR MUFFS

Ear plugs are the most popular choice because they are seen as the most economical solution and they can easily be worn with other PPE.

- **Single Use Ear Plugs** are ideal for use in high-contamination environments and by work-site visitors.
- **Multiple Use Ear Plugs** are reusable and easy to clean, making them ideal for use in manufacturing, construction, and MRO.
- **Corded and Uncorded** options are available in both families. Uncorded is more economical, while the corded plugs are easier to keep track of by allowing the user to wear the ear plugs around their neck when they are not in use.

The correct use of ear plugs is critical to ensuring optimal performance, and we encourage proper training and practice to achieve this. Improper use can minimize or negate the hearing protection properties of the ear plug and expose the wearer to potential hearing loss.

ALL PIP HEARING PROTECTION PRODUCTS HAVE A NOISE REDUCTION RATING (NRR)

Ear muffs provide a more secure form of hearing protection, especially because they are easier to use and allow the user to gain maximum protection from the product. There are two types of ear muffs: passive and active.

- **Electronic** Ear Muffs feature an electronic protection system that digitally limits all sound through the internal speakers to a safe level. Models with Active Listening, allow you to communicate with others or hear warning signals while protected against impulsive or intermittent hazardous noise.
- **Passive** muffs do not have any electronic features, and are available in headband, neckband, and cap mounted styles – the latter two can be worn with a hard hat.

FUNDAMENTALS OF EYE PROTECTION

EYE PROTECTION IS DESIGNED TO HELP SHIELD YOUR EYES FROM CERTAIN IMPACTS, DEBRIS, DUST, SPLASHES, AND OTHER POTENTIAL HAZARDS THAT COULD PRESENT SEVERE INJURY TO THE EYES, INCLUDING POTENTIAL BLINDNESS. PIP'S BOUTON® OPTICAL PROVIDES A COMPREHENSIVE LINE OF POTENTIAL SOLUTIONS FOR SAFETY EYEWEAR NEEDS.

SAFETY GLASSES

In addition to temples and nose pads to improve fit and comfort, there are several options also available to meet specific needs:

- **Readers** are available in different diopters and help magnify text so it becomes easier to read.
- **Foam-Lined Safety Glasses** seal better against the wearer's face, helping better protect against dust and other small debris. This style of eye protection is not recommended for splash protection.
- **Over-The-Glass (OTG) Safety Glasses** can be worn over prescription eyewear to provide the required protection. Standard eyeglasses cannot act as safety glasses and should not be treated as such.
- **Dielectric Safety Glasses** do not contain any metal components, making them non-conductive for those who are working near or around electricity.

Once the style of protective eyewear is chosen, the next consideration should be the lens technology for the task at hand. Depending on the work environment and lighting conditions, there are several different options for lenses. This information is detailed in the Bouton® Optical Lens Treatment Quick Guide on the subsequent pages.

GOGGLES & FACE SHIELDS

With goggles, the type of venting required for the work environment is the most critical consideration.

- **Direct Vented** goggles help minimize fogging and should be used when there is no liquid splash risk. Direct vented goggles have straight-line perforations that allow direct airflow from the work environment.
- **Indirect Vented** goggles help minimize fogging and should be used when there is liquid splash risk. Indirect vented goggles have hooded vents to allow indirect airflow from the work environment.
- **Non-Vented** have no openings for airflow or ventilation.

Face shields do just that – they protect the face from debris, such as sparks, or certain impacts. Face shields should not be used as a replacement for safety eyewear, as they are designed to be used in conjunction with eye protection products. Face shields can be worn with standard head gear or they can be fitted on your hard hat with the assistance of an adapter or bracket.

bouton[®] OPTICAL

FOR OVER 60 YEARS,
BOUTON[®] HAS BUILT ITS NAME
BY DEVELOPING SAFETY GLASSES
WORKERS WANT TO WEAR. BY
FOCUSING ON INNOVATION AND
STYLE, THE BOUTON[®] LEGACY
CONTINUES TO GROW TODAY.

BOUTON[®]
LENS TECHNOLOGIES

ANTI-REFLECTIVE PLUS[™]
TECHNOLOGY

THE CLOSEST THING TO
NOT WEARING GLASSES

Bouton[®] Anti-ReflectivePLUS[™] lenses allow an astounding 96% Visible Light Transmission (VLT) compared to the 88–90% VLT provided by standard clear lenses. Durable Anti-ReflectivePLUS[™] Anti-Reflective coating significantly reduces the amount of light that reflects back into the wearer's eyes, providing ultimate visual acuity. Inspect, distinguish and see with more clarity—and less eye fatigue.

Available in the Following Styles: Bullseye, Recon, Commander, Supersonic, Q-Vision, Radar, Captain

TAKE ANTI-REFLECTIVE PLUS™ TECHNOLOGY OUTDOORS WITH MIRROR PLUS LENSES

A mirror coating on the face of the lens will deflect sunlight from the wearer's eyes, delivering noticeably less glare and reflection than standard gray lenses. Anti-ReflectivePLUS™ coating on the back of the lens significantly reduces light reflecting back into the eye for enhanced comfort and performance.

Available in the Following Styles: Sunburst, Squadron, Bond

FILTER REFLECTED SUNLIGHT FOR A CLEAR VIEW

Reflected sunlight from smooth surfaces, such as water, pavement, and snow can dangerously hinder vision and cause significant eyestrain. PolarizedXL5™ lenses filter the scatter light by controlling the angle at which it enters the lens. The result is clearer vision of the surrounding area and greatly reducing eye glare.

Available in the Following Styles: Commander, Sunburst

I/O BLUE
TECHNOLOGY

PROTECT AGAINST HARMFUL BLUE LIGHT

Overexposure to blue light, including smart phones, tablets and computer screens, has been known to cause eyestrain, fatigue and possibly contribute to long term macular degeneration. I/O Blue lenses are uniquely coated to help filter out harsh blue light and improve worker comfort and visual acuity. Lenses are also treated with a contrast booster to enhance color contrast.

Available in the Following Styles: Bullseye, Recon, Commander, Supersonic, Q-Vision, Radar, Captain, Bond, Blizzard

GRADIENT™
TECHNOLOGY

REDUCE GLARE FROM OVERHEAD LIGHT

High-powered overhead lights, such as fluorescent and mercury lighting, can cause glare that increases eye strain. Gradient lenses feature a slight mirror coating on the top portion of the lens, reducing glare, while the remainder of the lens remains clear. As a result, workers are still able to see clearly when looking straight ahead or down at their work.

Available in the Following Styles: Bullseye, Recon, Supersonic

IT'S NOT LESS FOG IT'S FOGLESS®

Lenses fog for many reasons, all of which are related to ambient temperature and moisture in the air. When a rapid temperature change occurs, micro-water droplets in the air will collect on untreated lenses, causing the lenses to fog and impede vision.

FOGLESS® 3SIXTY™ TECHNOLOGY PROVIDES THE ULTIMATE FOG PREVENTION WHEN:

- Transitioning between warm and cool environments
- Working in a humid or wet environment
- Engaging in an activity that causes perspiration
- Eye protection is used with respiratory equipment

FogLess® 3Sixty™ Technology

Standard Anti-Fog

THE CHOICE IS CLEAR

BOUTON® FOGLESS® 3SIXTY™ was tested in accordance to procedures outlined in the European EN 166 standard in performing this test, lenses were pre-treated and repeatedly exposed to moisture for an extensive period, wiping continually to simulate harsh field conditions.

FOGLESS® 3SIXTY™ REMAINED CLEAR EVEN AFTER SIX MINUTES OF TESTING, NO OTHER PRODUCT WITH STANDARD ANTI-FOG TREATMENT CAME CLOSE.

PERFORMANCE

Most eyewear on the market has only a light anti-fog coating that wears away quickly. Only Bouton® FogLess® 3Sixty™ Technology applies a densely bonded coating that continues to bead away water and moisture, even after repeated cleaning.

CAUTION

Lens fogging inhibits vision and productivity, which may result in workers removing their safety glasses - exposing their eyes to debris and impact. PIP's advanced FogLess® 3Sixty™ formulation was developed to adhere permanently to the lens, ensuring long-lasting performance that is able to withstand multiple lens cleanings.

TAKE THE LEAD

BOUTON[®] LENS TREATMENT QUICK GUIDE

LENS TREATMENT/COLOR	VISIBLE LIGHT TRANSMISSION	DESCRIPTION	BENEFITS
ANTI-SCRATCH	---	"Hardcoat" treatment toughens lens surface	Longer product life with fewer scratches.
ANTI-FOG	---	Surface coating that reduces fogging	Maintains clear vision. Ideal for food plants or cleaning operations with high-humidity environments.
■ CLEAR	90%	Clear polycarbonate lens	No color distortion, all polycarbonate has 99.9% UV absorption. General use.
■ AMBER	82%	Polycarbonate made of bright amber/yellow color	Enhances visual acuity. Ideal for professional drivers in foggy, rainy or snowy conditions.
■ INDOOR/OUTDOOR	60%	Light mirror coating on clear lens	Enough light transmission for use indoors, reduces pupil adjustment time. Ideal for indoor-outdoor workers.
■ INDOOR/OUTDOOR BLUE	55%	Slight yellow tint + light mirror coating	Alleviates "digital eye strain" from screens, ideal for anyone working extended periods with computer screens or electronic devices.
■ LIGHT BLUE	58%	Light blue tinted polycarbonate	Relieves eye strain from bright, overhead fluorescent lighting.
■ GRAY	12%	Gray polycarbonate lens	Darkening effect with little color distortion, best used outdoors in bright sun.
■ DARK BROWN	12%	Brown polycarbonate lens	Darkening effect with improved color contrast. Best used outdoors in nature-green colors enhanced.
■ MIRROR	10-18%	Front surface coating reflects light from lens	Less light transmission for a darkening effect, great in bright environments: snow, sand, rocks, water.
■ IR FILTER SHADE 3.0	10%	Dark green polycarbonate lens	Protection from welding arc and IR light. Not to be used for welding or when operating vehicles.
■ IR FILTER SHADE 5.0	2%	Dark green polycarbonate lens	Protection from welding arc and IR light. Not to be used for welding or when operating vehicles.

EVA® SERIES DESIGNED TO FIT

A PORTION OF ALL PROCEEDS FROM OUR EVA® EYEWEAR IS PROUDLY DONATED TO ORGANIZATIONS WITH A MISSION OF COMBATING CANCER.

Breast cancer has impacted everyone in one way or another and Eva® eyewear provides a great venue to promote awareness. Perhaps one more woman in the workplace will get a mammogram because she sees the pink ribbons on all of her co-workers' glasses. Please help PIP support this wonderful cause as we provide a VISION FOR A CAUSE!

ALL DAY COMFORT

CUSTOM IMPRINTED EYEWEAR

FAST, EASY & PRECISE

PIP has the ability to custom imprint your logo and/or personalized message onto our safety eyewear. Most styles can be printed on the temples or the lenses.

Imprinted eyewear has many benefits. Using your logo or brand promotes corporate identity and provides a uniform appearance throughout your workforce.

VENTILATION OPTIONS

NON-VENTED

Non-vented goggles have no openings for airflow or ventilation.

INDIRECT VENTILATION

Indirect vented goggles help minimize fogging and should be used when there is liquid splash risk. Indirect vented goggles have hooded vents to allow indirect airflow from the work environment.

DIRECT VENTILATION

Direct vented goggles help minimize fogging and should be used when there is no liquid splash risk. Direct vented goggles have straight-line perforations that allow direct airflow from the work environment.

UNDERSTANDING THE ANSI STANDARD

THE ANSI/ISEA 107-2015 IS NOW THE APPROVED STANDARD ON HIGH VISIBILITY APPAREL OFFERING GARMENT CATEGORIES OF PERFORMANCE CLASSES. THIS STANDARD CONSOLIDATES THE ANSI/ISEA 107-2010 FOR HIGH-VISIBILITY SAFETY APPAREL (HVSA) AND THE ANSI/ISEA 207-2011 AMERICAN NATIONAL STANDARD FOR HIGH-VISIBILITY PUBLIC SAFETY VESTS INTO A SINGLE COMPREHENSIVE STANDARD GOING FORWARD.

ANSI TYPE O

CLASS 1

Off-Road Use - Provides added visibility to workers who are not exposed to traffic.

ANSI TYPE R

CLASS 2 & CLASS 3

Roadway Use - Enhanced visibility for workers who are exposed to traffic and working against complex backgrounds.

ANSI TYPE P

CLASS 2 & CLASS 3

Public Safety - Enhanced visibility for emergency and incident responders and law enforcement personnel in both roadway and off-road environments.

ANSI CLASS E

Class E apparel includes pants, bib overalls, shorts, and gaiters. These garments are not compliant when they are worn alone, though, when combined with Class 2 or Class 3 apparel, the combination satisfies Class 3 requirements.

ANSI STANDARDS

GARMENT LABEL REQUIREMENTS

The first marking (X) indicates the garment type in accordance with Table 1. The second marking (Y) indicates the Performance Class in accordance with Table 1. The third marking (Z) indicates the garment's flame resistance statement in accordance with Section 12.2(e) and shall be represented as either "FR" or "Not FR".

For supplemental items Performance Class E, only the marking Y (indicating Performance Class) and Z (indicating flame resistance statement) are required.

MOST CLOTHING IS

RETAIL READY

MINIMUM REQUIREMENTS

GARMENT TYPE	PERFORMANCE CLASS	BACKGROUND FABRIC	RETRO REFLECTIVE MATERIAL
Type O	Class 1	217 in ²	155 in ²
Type R	Class 2*	775 in ²	201 in ²
	Class 3*	1240 in ²	310 in ²
Type P	Class 2	450 in ²	201 in ²
	Class 3	775 in ²	310 in ²
Supplemental Items**	Class E	465 in ²	109 in ²

*For the smallest size offered in Type R, a minimum of 540 in² (Performance Class 2) or 1,000 in² (Performance Class 3) of background material may be used to accommodate small-sized workers

**When a Supplemental Class E is worn with Performance Class 2 or 3, the overall classification for the ensemble shall be Performance Class 3

THE DANGERS OF COLD STRESS

KEEPING WORKERS WARM

With jackets, liners and pullovers, the principles of thermal energy are applied to ensure the worker stays as warm as possible, taking into consideration their environment.

- The wind resistance of the outer shell is critical, as it helps minimize the entrance of the denser cold air which would take the place of the warm air that is layered close to the body.
- Adding lofted or fleece insulation provides a layer that traps the warmer air beneath the shell and helps keep out the cold.
- Keeping dry also allows the worker to stay as warm as possible. Whether it's precipitation or water penetrating from the outside, or sweat generated by the worker, moisture can accelerate the effects of the cold environment and restrain the insulation's efficiency.

In order to stay warm it is important that work garments perform and remain adaptive to the work environment, activity, and duration.

- The effectiveness of the outer shell is the first consideration. High quality outer shells provide the desired resistance against wind and water, but also allow sweat to evaporate.
- In extremely cold conditions, it is better to dress in layers as opposed to wearing a jacket or coat with very thick lofts. The thicker lofts will restrict movement, which in turn means less body heat is generated. The proper insulation combined with fleece sweaters and wicking under-layers will provide optimal protection while remaining functional for the worker.
- The ability to remove layers and/or jacket linings becomes critical when there is a wide temperature differential. This will help reduce the risk of excessive wetness from sweating while still providing adequate cold protection in this environment.

CHOOSING A MATERIAL

There are various materials to consider when choosing the best thermal protection for your environment:

- **300 Denier Rip-Stop Shell Material** – durable and tear resistant material that provides wind and water resistance.
- **300 Denier Shell Material** – durable material that provides wind and water resistance
- **280 gram Polyester Fleece Insulation** – a versatile fabric that provides warmth and quick drying properties
- **Hi-Loft Polyester Fiberfill Insulation** – a built-in insulation that resists water absorption and is quilted to resist migration

THE COLD STRESS EQUATION

Low Temperature + Wind Speed + Wetness = Injuries & Illness

When the body is unable to warm itself, serious cold related illnesses and injuries may occur, and permanent tissue damage and death may result.

- Hypothermia can occur when land temperatures are above freezing or water temperatures are below 98.6°F / 37°C.
- Cold related illnesses can slowly overcome a person who has been chilled by low temperatures, brisk winds, or wet clothing.

PROTECTIVE WEAR DESIGNED FOR THE JOB

RAINWEAR AND SPLASHWEAR IS DESIGNED TO PROTECT WORKERS FROM LIQUID SPLASH AND CONTAMINANTS, DEFEND AGAINST HEAVY RAIN, AND PROVIDE SPLASH PROTECTION FOR PRESSURE WASHING APPLICATIONS. PRODUCTS ARE DESIGNED WITH ENHANCED FEATURES, CONSTRUCTION AND DURABILITY TO DELIVER SUPERIOR PERFORMANCE IN DEMANDING CONDITIONS.

Users are advised to conduct their own evaluations to determine the suitability of the protective clothing for each specific application. Previously worn suits should be inspected daily, especially before being put into use again, to ensure wear and tear, or prior chemical exposure has not reduced the integrity of the suit. Suits that show wear or have been in intimate contact with the chemicals should be properly disposed of.

All featured Falcon™ FR garments are treated to provide limited flammability and are self-extinguishing (ASTM D6413 test method).

APPLICATIONS: *Chemical Plants, Plating Facilities, General Maintenance*

200-01001

- Resistant to fats, oil and grease
- Convenient individual packaging
- Die cut for consistent sizing

APPLICATIONS: *Food Handling and General Preparation*

POLYETHYLENE

THE DIFFERENCE BETWEEN FR AND AR

FLAME RESISTANT (FR)

Flame Resistant garments earn their designation because they are made of fabrics that are inherently resistant to or are treated to be resistant to catching fire when exposed directly to flame. The material will resist ignition and/or self-extinguish when ignited, and they will not melt. FR garments also create a thermal barrier to help protect the wearer's skin when exposed to direct heat energy and may minimize the amount of 2nd and 3rd degree burns incurred. FR fabrics include:

- **Modacrylics, Aramids and Para-aramids** are among the inherently flame resistant fabrics. They will not lose those characteristics through wear or laundering.
- **Treated Fabrics**, such as cotton and cotton blends, require FR treatment to achieve self-extinguishing properties. This treatment will eventually fade with washing but, if the garment is properly cared for, the treatment can last the life of the garment. FR treated cotton and cotton blends provide a more comfortable and affordable solution.

ARC RATED (AR)

Arc Rated (AR) garments help to provide flame and thermal protection from exposure to an electrical arc flash. AR fabrics and garments are designed and treated to help limit the exposure and burn percentage as a result of an electrical arc flash incident.

In 2015, the NFPA introduced the new term "**AR (Arc Rated)**" to help identify the critical difference between AR and FR (Flame Resistant) clothing as it applies to Arc Flash Protection.

Remember: All AR garments are flame resistant, however not all FR garments are rated for arc flash protection.

There are many variables to consider when selecting **AR** protective clothing. Most importantly the employer must perform a **Hazard Risk Analysis** for the workplace to identify risks and set the appropriate boundaries. The results of this analysis will then direct the employer into the level of protection needed.

Each AR garment is given an **Arc Thermal Performance Value (ATPV)** or **Energy Break-open Threshold (EBT)**. This value represents the level of protection the garment is tested to provide when exposed to variable levels of heat in an electric arc flash. Higher levels of protection typically require thicker and/or additional layers. The ATPV or EBT of the garment should be equal to or greater than the energy level of the work area as determined by the Hazard Risk Analysis.

The NFPA 70E should be reviewed thoroughly and regularly to ensure compliance and to be aware of any revisions or updates as they occur.

DUAL CERTIFIED PROTECTION

Dual Certified means that the materials have been tested and certified to meet both the NFPA 70E (Arc Flash Protection) and the NFPA 2112 (Flash Fire Protection) standards. The NFPA 2112-2012 requires third party certification of the garment, and all PIP NFPA 2112-2012 certified garments are UL certified. All PIP Dual-Certified apparel are identified as such.

* NFPA 70E Table 130.7(C)(16) Note 1 - The combination of rubber insulating gloves and leather protectors satisfies the arc flash protection requirements.

NFPA 70E 2015 NOTABLE CHANGES

When determining which arc rating of PPE is required, the term HRC (Hazard/Risk Category) is now referred to as **"PPE Category."**

The former HRC Level 0 no longer exists. The NFPA now requires arc rated clothing for tasks that were previously identified as **Category 0.**

Arc rated balaclava hoods are required when an individual's head is inside the arc boundary. Arc rated full hoods are required when clothing rated higher than 12 cal/cm² is worn.

ARC FLASH PROTECTION KITS

25 & 33 CAL / 40-100 CAL ARC KITS

25 & 33 CAL ARC KITS

For higher voltage situations, PIP's 25 & 33 cal Arc Flash Kits are designed to meet your PPE 3 needs (insulating glove kits and arc rated hearing protection are not included). The kits come with safety helmet and arc hood in addition to the components needed to be in compliance with the NFPA 70E Standard.

40-100 CAL ARC KITS

Serious protection demands serious products. PIP has worked to develop multiple kits for high risk environments. Together with you, we can help you meet compliance regulations by offering you turn-key kits. (Insulating glove kits and arc rated hearing protection are not included).

CAL/CM²

LIGHTER IS BETTER 37% BETTER

ULTRALIGHT 40 CAL/CM² CLOTHING UTILIZES A HYBRID FABRIC TECHNOLOGY TO INCREASE GARMENT DURABILITY IN THE FIELD WHILE DECREASING ITS WEIGHT BY 37%. OUR ULTRALIGHT GARMENT USES A DUPONT® SHELL TO PROVIDE ITS SUPERIOR TENSILE STRENGTH, INDUSTRIAL WASH RESISTANCE, AND LONG-TERM DURABILITY. MEETS NFPA 70E, ASTM F1506, OSHA 29 CFR 1910.269.

- 40 CAL/CM² HYBRID FABRIC TECHNOLOGY
- SHELL: DUPONT® PROTERA® (FIBER BLEND: 33% NOMEX® AND KEVLAR®, 65% MODACRYLIC, 2% ANTISTATIC)
- INSIDE LAYER: WESTEX® ULTRASOFT® INTERLOCK KNIT (88% COTTON, 12% HIGH TENACITY NYLON)

HYBRID FABRIC TECHNOLOGY

UNDERSTANDING RUBBER INSULATING GLOVES

AS ONE OF THE MOST IMPORTANT COMPONENTS OF PPE FOR ELECTRICAL WORKERS, RUBBER INSULATING GLOVES NEED TO BE STRONG, FLEXIBLE, DURABLE, AND, OF COURSE, DIELECTRIC.

STANDARDS & USE

The proper function of rubber insulating gloves is extremely critical, and there are strict requirements outlined by OSHA 29 CFR 1910.137 with regards to their use and in-service care. There are also different classes of gloves available depending on the level of voltage protection they provide (see the table on the following page for this information).

It is critical to inspect your rubber insulating gloves before each day's use and after any action that could be expected to cause damage to the glove. If the gloves show any evidence of damage, they should not be used.

LEATHER PROTECTORS

Leather protectors must be worn over the rubber insulating gloves when working with them. Leather protectors help provide cut, puncture, and abrasion protection for the rubber insulating gloves. The class of the leather protectors needs to match the class of the electrical gloves and leather protectors alone do **not** provide electrical protection.

GLOVE STORAGE BAGS

When they are not in use, rubber insulating gloves should be stored finger tips up in a glove bag and hung – **not laid** – flat. Leather protectors should be removed prior to storage and the rubber insulating gloves should never be folded. The bag should be stored in as dry and cool a place as possible (95°F maximum), away from sources of ozone and direct sunlight.

ELECTRICAL SAFETY

STRAIGHT CUFF STYLES

Novax® products exceed all requirements of ASTM D120 & D1051, ensuring compliance with OSHA regulations and satisfying NFPA 70E requirements for protection against electrical shock hazards. The natural rubber construction offers excellent dielectric properties combined with flexibility, strength, and durability. Other features include a contoured shape that reduces hand fatigue and a rolled cuff for increased durability during donning and doffing.

WHY USE **ERGONOMICS**

WHEN THE WEAR AND TEAR OF THE JOB STARTS TO TAKE ITS TOLL, THERE IS SOMEWHERE TO TURN TO HELP RELIEVE SOME OF THE PRESSURE AND DISCOMFORT ONE ENDURES, ESPECIALLY WHEN PERFORMING REPETITIVE TASKS AND/OR WHEN LIFTING IS INVOLVED. ERGONOMIC PRODUCTS CAN LIMIT DISCOMFORT AND HELP REDUCE STRESS ON THE GIVEN BODY PART THE PRODUCT IS DESIGNED TO HELP.

SLEEVES & SUPPORTS

- **Wrist, elbow, and knee sleeves** can reduce stress, strain, and swelling.
- **Elbow and wrist supports** provide additional reinforcement for those areas.
- **Back supports** support the lumbar area and provide stability for the worker when lifting.

PREVENT & PROTECT

Ergonomics should not only be worn once discomfort or pain is incurred. Using Ergonomic products can proactively help reduce injuries and provide a more comfortable work experience.

By using Ergonomic products, one can continue working more comfortably and productively by significantly reducing the pains and strains incurred from day-to-day work.

REDUCE THE CHANCE OF
COSTLY BACK INJURIES & LOST WORK DAYS

BREATHING HAZARDS

GASES

Substances similar to air in their ability to diffuse or spread freely throughout a container or area. Examples include oxygen, carbon monoxide, carbon dioxide, nitrogen and helium.

FUMES

Created when solid materials vaporize under high heat. Fumes come from operations such as welding, smelting and pouring of molten metal.

VAPORS

Formed when a solid or liquid evaporates. Common examples of vapors are gasoline, paint thinners and degreaser solvents.

PARTICULATES

Solid particles are produced by operations such as grinding, crushing, drilling, blasting, sanding and milling.

UNDERSTANDING SAFETY & EMERGENCY BEACONS

WARNING BEACONS ARE DESIGNED TO PROVIDE INSTANT VISIBILITY WHERE NEEDED, CALLING ATTENTION TO ANYONE IN THEIR VICINITY.

Their design and brightness combined with the different colors and accessory items make warning beacons infinitely versatile. They can be used to draw attention to road closures, obstructions, spills, or loading/unloading zones and help reduce potentially serious and otherwise avoidable injuries.

LIGHT BEAM PROFILE

Beacons are designed to deliver the most intense part of the light beam in a range of 0-5° above horizontal, with a peak near 3°. Due to this beam profile, these beacons will not dazzle or impede the vision of users at short range unless it's positioned at eye level.

WHY USE WARNING BEACONS OVER CONVENTIONAL FLARES?

Conventional Flares are often pyrotechnic, which require an open flame to operate. This is inherently dangerous and limits areas where they can be used. Most flares also include mixtures that can create toxic fumes and residue.

Incandescent and Strobe Lights can cause night vision, point fixation, and distance judgment issues, especially with impaired or sleep-deprived drivers.

Warning Beacons featured in this section utilize LED technology to produce an intensely bright display and project at an angle that will not dazzle or impede the vision of drivers. Standalone units and units compatible with safety triangles are available.

SAFETY & EMERGENCY BEACONS

272 E-FLARE™ BEACONS

274 FLASH BATONS

SAFETY & EMERGENCY BEACONS

E-FLARE™

E-FLARE™ WARNING BEACONS

INTENSELY BRIGHT

Can be seen for up to 3/4 of a mile and features full 360° illumination. Angle and beam projection minimizes the risk of target fixation and distance judgment problems associated with strobe and incandescent lights.

LIGHTWEIGHT & EASY TO USE

Beacon weighs less than 10 ounces with four "AA" batteries installed. Improved activation enables a simple twist of the lens to the desired function.

SAFER & BETTER FOR THE ENVIRONMENT

Unlike pyrotechnic flares, there is no risk of fire or explosion, and no toxic fumes or residues.

DURABLE

E-Flare™ beacons can survive up to a 3-foot drop onto a concrete surface. They are also dust-proof and water resistant (up to a depth of 100 ft.).

INFINITELY VERSATILE

Body molded clips with added holes easily attach to belts and clothing. Base accessories are available for heavy-duty mounted applications

HAZMAT accredited for use in Class 1, Division 2 / Zone 2 hazardous areas.

Patented Fresnel lens and high-luminosity LEDs allow beam to be visible for 3/4 mile

Shatterproof polycarbonate lens

Colored pins indicate beacon light colors

Reflective strip and fluorescent body for maximum visibility

High-strength clips with added holes for versatility of attachment

Impact resistant ABS body

Compact and lightweight, weighs under 10 oz. with 4 "AA" batteries

IDEAL FOR POLICE, FIRE, UTILITIES, RAIL & PORT, WAREHOUSE & FACTORY

RUBBER BASE MOUNT 939-EFBASE

- General purpose base fits all E-Flare™ beacons

AVIATION RUBBER BASE MOUNT 939-EFAVBASE

- Secure base for special purposes that fits all beacons

MAGNETIC BASE MOUNT 939-EFMAGBASE

- Combined magnetic base and cap
- Rated to 50 MPH when securely mounted on vehicle
- Fits all E-Flare™ beacons

MAGNETIC MOUNTING CLIP 939-EFMAGCLIP

- For stationary objects (not for moving vehicles)
- Attaches to any E-Flare™ beacon

CONE MOUNTING CLIP 939-EFCLIP

- Enables vertical positioning on most types of cones
- Attaches to any E-Flare™ beacon

FLOTATION COLLAR 939-EFFCOL/L

- Provides reliable self-righting buoyancy for marine use
- Includes lanyard
- Attaches to 8" tall E-Flare™ beacons only

STORAGE BAG - SMALL 939-EFBAG-2

- Carry bag for 2 to 3 beacons plus accessories

STORAGE BAG - LARGE 939-EFBAG-4

- Carry bag for 4 to 6 beacons plus accessories

MAGNETIC CAP BASE

BATONS

IDEAL FOR POLICE, FIREFIGHTERS, AIRPORT WORKERS, TRAFFIC CONTROLLERS, PARKING VALETS, CONSTRUCTION WORKERS AND OTHER PUBLIC SAFETY PERSONNEL

HEAT STRESS IS 100% PREVENTABLE

EACH YEAR, MILLIONS OF WORKERS ARE EXPOSED TO POTENTIAL HEAT STRESS. INJURIES RELATED TO HEAT STRESS RANGE FROM DIZZINESS TO DEATH. WITH PROPER EDUCATION, TRAINING, AND COOLING PRODUCTS, HEAT STRESS RELATED INJURIES CAN BE AVOIDED.

COOLING TECHNOLOGIES

PHASE CHANGE

Cold temperature is absorbed by the **Phase Change** material, changing it from a clear liquid to an opaque solid as it is activated.

To use, place the activated phase change pack in the torso garment and wear it against body. The cold temperature begins to be transferred to the wearer as the latent heat is absorbed by the Phase Change material. The material begins to turn back to a clear liquid as it deactivates. Reactivate as needed.

ACTIVATION & USE

PIP's Heat Stress line ranges from premium products that will last your workers through multiple seasons to more economical solutions that are meant for single-use. The activation time is included with each product.

EVAPORATIVE

To activate **Evaporative** cooling products, water is first absorbed by the product's cooling fibers or polymers. Cooling occurs when the moisture within the unit evaporates, creating a cooling sensation for the wearer. When activating, you may use room temperature water. The products must be exposed to air movement to facilitate cooling, and are meant for use over other PPE garments.

ABSORPTIVE

Absorptive materials help to keep the sweat and the sting out of workers' eyes while trapping and moving sweat for a safer, more comfortable job with fewer distractions.

SUN PROTECTION

PIP's **Sun Protection** products include hats and visors with neck shades that will help to screen workers from the sun, to alleviate the toll it takes on productivity, skin and the ability to keep hydrated.

LIMITED WARRANTY

Protective Industrial Products, Inc.® (PIP) warrants only that PIP products will be free from defects in materials and workmanship at the time of sale. Upon receipt of each shipment, the customer must examine the products for defect or shortage and notify PIP in writing within thirty (30) days after such receipt of any claims reasonably discernible within such thirty (30) day period. All claims not reasonably discernible within thirty (30) days must be made in writing within one (1) year after receipt of shipment. Any claim not timely made shall be waived. This limited warranty is exclusive and in lieu of all other warranties, express, implied or statutory. PIP's entire obligation and the exclusive remedy to any party for breach of this limited warranty shall be limited to replacement of the defective product or refund of the original purchase price of the product, at PIP's option. PIP's limited warranty shall not apply to PIP products that have been subject to misuse, accident, negligence, handling, storage, or use.

DISCLAIMER OF IMPLIED WARRANTIES

All implied warranties which may arise by implication of law or application, course of dealing, usage of trade, including, but not limited to, implied warranties of merchantability, fitness for a particular purpose title, and non-infringement are expressly excluded. The user is solely responsible for the suitability of the product selected for a particular application. This catalog is the exclusive property of Protective Industrial Products, Inc.® It may not be copied, duplicated or reproduced in whole or in part by any means without the written permission of Protective Industrial Products, Inc.®

TRIAL-ORDER PROGRAM

Trial orders are available to customers of Protective Industrial Products distributors on a satisfaction or no-pay basis. The program lets end-users evaluate PIP gloves, in their actual application and on-site condition, on a satisfaction-or-they-don't-pay basis to make sure they're the right gloves for the job. For more information about our "Satisfaction-or-No-Pay" guaranteed Trial Order Program, please contact your PIP Sales Representative.
